Foreword

GLORY and fame have come to some of the sons of the Medical College of Virginia, but this is recorded in history. Our work is of a smaller nature—to record the happenings of a year.

In the presentation of this volume, the staff presents its best efforts toward chronicling the events and delightful experiences of life in the Medical College for the last year. We hope you will find them reflected—though perhaps imperfectly—in these pages.

If in the future years, when you reach up and remove this time-worn volume from its dust-encrusted repose, and, on turning through the pages you recognize the names and faces of the pals of your school days of long ago, and your heart is warmed at the sight of familiar scenes and faces, and you again feel the thrill of the old Medical College spirit—then, indeed, we shall not have labored in vain.

The Campaign Bears Fruit

The campaign for funds conducted by the Medical College of Virginia last spring began first with students and faculty, followed by an appeal to alumni and the city of Richmond. When the student body had pledged more than forty thousand dollars, and the faculty had contributed somewhat more than sixty thousand dollars, it was pretty well assured that the alumni and the city of Richmond would respond. Thus far the total of campaign pledges runs considerably beyond a half million dollars, and the campaign is still going forward in a quiet way.

As a direct result of the campaign there have been written into wills several large sums, ultimately to come to the college. Moreover, it is believed that other individuals are likewise contemplating providing for the college. How fine it will be when every friend and alumnus of the institution will make at least some provision for the future of the Medical College of Virginia when planning for the settlement of his estate! This ideal objective is definitely attainable, it is believed.

Many are the moral advantages which have accrued from the campaign: The college is better known, respected, and loved; old friends rejoice in it anew, and additional friends have been won for it.

As a direct outcome of the campaign the first full-time clinician in the modern sense has been added to the staff of the School of Medicine; and when campaign pledges have been paid in larger numbers, work upon two new buildings will start. One of these will be a women’s dormitory and the other a laboratory and clinic building. Then, just as soon as possible, the new college library will be constructed in physical association with the magnificent library and home of the Richmond Academy of Medicine, which will be erected on the northeast corner of Clay and Twelfth streets, facing the Confederate Museum.
The Founding of the Medical College of Virginia

By

WYNDHAM B. BLANTON, M.D.

Richmond, Va.

THE STORY of the founding of the Medical College of Virginia forms a natural chapter in the general history of medical education in this country. The Revolution did not emancipate America politically without creating a natural desire for freedom and self-expression in education. The practice of indenture and the habit of going abroad for a medical education—the grand tour—both stopped with Yorktown. The first American medical school was opened at the University of Pennsylvania in 1765. By 1783 similar institutions were planted in New York City and at Harvard. By 1837 twelve medical colleges were in operation, three of which were in the South. In Virginia medical education was early a prominent issue. An abortive medical department was organized at William and Mary College in 1779 when the famous Dr. James McClurg was made professor of medicine. Quesney’s Academy in Richmond was an ambitious scheme for higher education, and among its chairs was one devoted to Anatomy. In 1825 the University of Virginia opened the first real medical school in the state, and by 1838 Dr. Peter Mettauer was attracting scores of students to his academy in Prince Edward. He was teaching and practicing brilliantly in the neighborhood of Hampden-Sidney College. His reputation was national. Why his school was not taken over as the medical department of Hampden-Sidney College is difficult to understand. He was an alumnus of that college and his flourishing school was less than a mile away. The amalgamation of his school with Randolph-Macon some years later, and the tenor of a letter of his, now in possession of Dr. Joseph L. Miller, of Thomas, West Virginia, shows that Mettauer evidently had strong feeling in the matter.

The immediate events which led to the founding of this school are interesting. It was generally realized that the great majority of medical students from Virginia were drifting North for an education in spite of the fact that the University of Virginia had been in the field thirteen years. It was even claimed in 1843 that since 1840, 4,440 out of a total of 5,900 Virginia students of medicine had matriculated at the University of Pennsylvania. Another effort to stem the exodus of Virginians must be made. The lay papers joined with the profession in urging the study of medicine at home.

Unconsciously, the fortunes of the men who were to found the new college were drawing them to Richmond, so that by 1838 there were three ex-professors of medicine and others with fine academic training on the field. Two of them had occupied important positions in the medical faculty of the University of Virginia. Dr. Thomas Johnson held the chair of Anatomy and Surgery at Charlottesville for ten years before he resigned. He then moved to Richmond. Dr. Augustus L. Warner of Baltimore was appointed to succeed Dr. Johnson. He also resigned, and in 1837 moved to Richmond. So strong was the teaching instinct in him that he advertised in the Richmond daily papers the immediate opening of a private medical school of his own. By October 2, 1837, he announced that he was prepared to receive students. These private plans appear to have been cut short by a more ambitious scheme for medical education in Richmond centering around Warner, John Cullen, R. L. Bohannon and L. W. Chamberlayne. The resolution which the Hampden-Sidney College Board of Trustees acted upon on December 1, 1837, must have originated with them. At any event a medical college was created in Richmond on that date as a department of Hampden-Sidney College.
The regulations drawn up at this time provided for six professors who were to give a course of lectures of five months (November to March) each year. Two years previous study with a reputable practitioner, attendance upon a full course of lectures, dissection, and a thesis, were the requirements for graduation. The degree of M.D. was to be conferred by the president and trustees of Hampden-Sidney College. The first faculty and the courses given were as follows:

Thomas Johnson, professor of Anatomy and Physiology.
John Cullen, professor of Theory and Practice of Medicine.
L. W. Chamberlayne, professor of Materia Medica and Therapeutics.
Augustus L. Warner, professor of Surgery, and dean.
Socrates Maupin, professor of Chemistry and Pharmacy.

Forty-six students enrolled the first year. By 1850 there were ninety matriculates. At first a private venture, the state was finally aroused to foster it by substantial pecuniary help. For several years both the college and infirmary were under one roof, housed in the Union Hotel, Twelfth and Main streets. The Richmond papers of the day wrote enthusiastically of the physical outlay. The museum and chemical equipment were impressive. The school was much in the daily press at the opening of each session. For a week or ten days each professor gave a popular lecture to which the general public was invited. These lectures were fully commented upon in the papers the following day. In 1850 the school was moved to the new building on Shockoe Hill, which is now known as the Egyptian building. Here again the college and infirmary were under one roof. There were three lecture rooms, an airy dissecting room, and a basement. Gas lights were a feature. The infirmary had three wards and cared for patients for from $3.00 to $5.00 a week.

Among the early faculties there occur illustrious names which should not be forgotten. Jeffries Wyman, a graduate of Harvard Medical School. Three years professor of Anatomy (1843-1847). He was called to the Harvard professorship of Anatomy. He became a distinguished paleontologist as well as anatomist. It was he who was responsible for the splendid museum of our college in those days.

Charles Bell Gibson.—Like so many others was educated at the University of Pennsylvania. He was in the faculty from 1846-1865. He introduced ether anesthesia into Virginia. He was an orator and soldier as well as a great surgeon.

David H. Tucker.—Student of medicine at both the University of Virginia and the University of Pennsylvania. Then "walked the hospitals," especially in Paris. He was a distinguished professor of medicine (1847-1869).

Beverly R. Welford.—Graduate of the University of Maryland. Professor of Materia Medica and Therapeutics (1854-1878). He enjoyed the distinction of being once president of the American Medical Association.

E. Brown Sequard.—International physiologist, was just long enough in the faculty (1853-1855) to establish a "menagerie" of dogs and cats in the basement and to leave upon his students an indelible impression of a great vivisectionist and original investigator in one of the fundamental sciences.
Stuart McGuire, M.D., LL.D.
President Emeritus
Medical College of Virginia
William T. Sanger, B.A., M.A., Ph.D.

President
Medical College of Virginia
The Inauguration

The inauguration of Dr. William Thomas Sanger as president of the Medical College of Virginia was observed on Monday, May 31, 1926, with impressive exercises. The installation ceremonies were held at the Lyric Theater at 11 o'clock, with the Honorable Harry Floyd Byrd, Governor of Virginia, presiding.

A notable feature of the inauguration, and one which attracted wide attention was the procession, in cap and gown, of the student body headed by the faculty, the new president, and distinguished visitors; this stretched for three city blocks and moved in solemn and impressive order from the college building at Twelfth and Clay streets out through the Capitol Square to the Lyric Building at Ninth and Broad streets. The Governor of the State walked with President Sanger at the head of the line.

The Lyric Building was filled to capacity. Seated on the platform was a distinguished array of men eminent in the field of education, finance, and government. The pit of the theater was filled with alumni and students, a touch of color being lent by the large number of women visitors present.

The invocation was offered by Dr. F. W. Boatwright, president of the University of Richmond, and an address of welcome and congratulation by the governor. President Sanger, the speaker of the occasion, was presented by Mr. Eppa Hunton, Junior, chairman of the Board of Visitors of the Medical College of Virginia.

The inaugural address of the present was notable, not so much for its reference to the long and distinguished record of the institution as for the picture he held forth of predicated achievements which would place the college in the forefront of all similar institutions, wherever located.

President Sanger was for several years secretary of the Virginia State Board of Education. Before entering actively into the service of the state he had a distinguished and varied career as an educator, both within and without the confines of the Old Dominion. For these reasons, joined with his innate ability, energy, and force, the Medical College of Virginia considered itself fortunate in securing his services. It was, therefore, on this account, that the inaugural pronouncements of the new president were followed with the utmost attention as being fraught with consummate significance.
Under the leadership of Doctor Sanger, it was freely predicted by members of the Board of Visitors, as well as by faculty members, that the banner of the Medical College of Virginia would move rapidly to an even brighter day. The inaugural address of the president materially increased the confidence which his acceptance of college leadership had brought, and stamped him not only as a man of distinguished and wide vision, but one of dynamic energy and strong leadership.

Among the very distinguished men who occupied seats on the stage and listened with approbation and evident pleasure to the address of the president, was Dr. Stuart McGuire, retiring president, whose association with the college has been invaluable.

Besides the addresses from the Governor and others, noteworthy were the remarks of Dr. Samuel P. Capen, Chancellor of the University of Buffalo, and those of Dr. B. M. Randolph, of George Washington University.

The benediction was pronounced by Dr. Paul H. Bowman, president of Bridgewater College.

It is believed that the inauguration of Dr. William Thomas Sanger as president of the Medical College of Virginia opened up a new era and will bring a larger and fuller measure of accomplishment, of effort, and success to this leader among the professional schools of the South.

At night on inauguration day, as a further part of the ceremonies, short papers were presented at the formal dinner at the Commonwealth Club by Dr. Wyndham B. Blanton for Hampden-Sidney College; Dr. Stuart McGuire, retiring president, Medical College of Virginia; Dean C. B. Jordan, dean School of Pharmacy, Purdue University; Dr. J. C. Flippin, dean Department of Medicine, University of Virginia; Miss Ethel Smith, secretary of the Virginia State Board of Examiners of Nurses, and Dr. Charles R. Turner, dean School of Dentistry, University of Pennsylvania. Mr. Eppa Hunton, Junior, chairman Board of Visitors of the Medical College of Virginia, presided at the dinner.

To the Classes

WHEN on that night of May the thirty-first there shall come forth from the City Auditorium a happy group of men surrounded by a multitude offering congratulations and singing their praises, the year of 1926-'27 will be over, and the class of '27 will be on its way to see life in its reality. We of the lower classes will have been left alone to "carry on" according to our own merits; and what the Medical College of Virginia does in the future will be our responsibility, and will reflect upon us.

The class of '28 will have for its duty the engineering of our policy for the coming year and the providing of stability and authority. The class of '29 should seek to equip itself for the future by becoming as versatile as possible in college life. The class of '30 should be prepared to handle the incoming neophytes of '31 and to instill into them the ideals that have made the Medical College of Virginia great.

We all have a charge. May we keep it as well as our predecessors! May it never be said that Medical College of Virginia was lacking in glory on our account.

History of the Senior Medical Class

HE old man's face took on a faraway look as he leaned back in his easy chair. Memories passing through his mind were reflected as minute changes of expression in his eyes. His grandson, then a freshman in medical school, waited anxiously, but, reverent to those memories unexpressed, said nothing.

The fire flickered solemnly casting huge shadows on the opposite wall. The very atmosphere was in accord with the weight of reminiscence.

Finally his lips began to move, cautiously at first, lest they disturb the solemnity of thought. "Those were the days! Ah, those were the days!"

The boy listened more intently but uttered not a sound.

"I laugh to think how frightened some of us were that first day we were introduced to the Anatomy Hall. Many of us covered our fears by playing with bones which appeared so gruesome. A little later the 'stiffs' were brought in and old Peyton who first honored us by calling us doctors, helped us pick out the 'skinny ones.' We began to see the seriousness of our task when Dr. Brodnax, the grand old man of M. C. V., showed us by his example that Medicine is an Art as well as a Science. Brody died during our Senior year, an inspiration to the very last.

"The second half of that year gave us a change of scene. There was a change of odor, too, the new one being that from the hydrogen sulfide generator. Some of us had to join the Y. M. C. A., and a few of us went to Sunday School, but we finally finished the first year.

"The class, minus the usual 15 per cent casualty of the first year, returned as Sophomores. We were right good (and admitted it), until the first day Charlie 'called on' us. We expected to be quizzed every day from then on. The system of oral exams was an institution in itself—when that was over the rest didn't matter. Anyway we remembered when State Board came that we had had a course in Physiology and in Pharmacology.

"But, ah, the thrill of the Junior year! We carried our stethoscopes in any convenient outside pocket and walked the length of the Dispensary with great gusto. Now we were Doctors and could speak at length of our patients. We learned a great deal. We were to give cod liver oil and orange juice to all babies, all cases of achylia gastrica were most beautiful, a doctor should never miss a chance to slam a lawyer, women like doctors with white hair, it is necessary to know the eentiology of diseases, typhoid has more complications than we thought. G. Paul never pulled the light-cord down, little Johnny had to be a Phi Beta Kappa to be here at all, and "Little Paul" Anderson was a good sport if there ever was one. That was the Junior year, most pleasant in retrospect.

"Then we were Seniors, and how griped we were when we had to wait eleven minutes for clinic to start. Our time was valuable. We had to see our patients on the wards, get our pictures taken, send in our 'write-up' for Cakie to put in our X-RAY. We had to see about internships, have class meetings to decide about commencements, caps and gowns, invitations, etc., ad infinitum. Occasionally, we had to go to classes, and occasionally we had to meet Dr. Call in the arena, frequently we wondered why we were asked such annoying questions. But we finally got through some way or other.

"I must tell you of 'Notification Night,' without which the years before would have been wasted. We, outside, had vision of Joe White voting to bust the whole class, of Dr. Haskell putting in a most decided vote to the contrary. It was a nerve-racking night, a tawdry night, but a glorious night. Even now its details are emblazoned on my memory. Ah, those were the days!"

A glorious light spread over the face of the speaker. The silence of the room was accentuated by the falling apart of the last embers. For a long time they sat there, each in his own thoughts.

"But what about graduation? You received your degree, did you not?"

"Oh, yes," said the veteran of a thousand battles with death, "at least I had my diploma the next day!"
SENIOR CLASS

EDWARD L. ALEXANDER
ELLESON, VA.

Phi Rho Sigma; University of Richmond Club; Historian of Sophomore Class; Cotillion Club; X-Ray Staff, 1924-25.

The Class of '27 would never have been complete and been able to stand four long years without Alex. Seriously speaking, Alex has all the traits of an ideal physician. A gentleman, a scholar, and those qualities which encourage others to entrust themselves without hesitation to his care, and the mature reasoning and sound judgment to make their confidence well placed.

RUFUS CARTER ALLEY
BRISTOL, VA.

Kappa Psi; Theta Kappa Psi; School of Pharmacy, M. C. V., 1920-22, Ph.G., 1922; Honor Society, School of Pharmacy, M. C. V.; William and Mary, 1922-23; Internes Club; Southwest Virginia Club; Interne Sheltering Arms Hospital, 1926-27; President of Student Body, 1926-27.

It is impossible to describe this tall, agile youth, whose integrity, high moral principles and reputation are above reproach; more especially is this true in the short space allotted, since Rufus is an outstanding character, born of that genuine-blooded race in the hills of Southwest Virginia, which is honored and revered throughout the South. For four long years he has gallantly striven to reach that high attainment, which only those who have the profession at heart set for their goal. Because of his sound judgment we were guided by unerring steps during his term as president of the Student Body in '26-'27.

It is entirely fitting to herein assert that a man of such sterling quality is indeed an honor to his Alma Mater and to the medical profession.

MEDICAL SCHOOL
LESTER LAWRENCE ANDERSON
ADVANCE, N. C.
B.A., Wake Forest College; Chi Zeta Chi.

This soft voiced typical son of the Old South came to us from Wake Forest. He happened along in his Junior year and very quickly established himself by his congeniality and an attitude of wanting to become one of us.

"Shaggy" is a quiet and unruffled man with the manner of a cavalier and as pleasant a personality as Aesculapius himself could wish for one of his disciples.

So long, old man, your success is manifest even now.

RAYMOND EVAN BAILEY
HAMLIN, W. VA.
B.S.; Phi Beta Pi; Theta Chi; Sphinx; German Club.

Bailey came to us from the wilds of West Virginia at the beginning of the Junior year. He has proven himself to be a student of exceptional ability. His gentlemanly character, friendly disposition, and lofty ideals have brought him the love and admiration of the class. With the fair sex he especially shines. He has been the etiological factor in many cases of heart disease during his stay in Richmond. With his striking personality, ambitious disposition, he should easily make good as a physician, and in the years to come, be a man to whom old M. C. V. will be justly proud.
SENIOR CLASS

WILLIAM LINWOOD BALL
RICHMOND, VA.

Alpha Kappa Kappa; Class Basketball, '23, '24, '25, '26; Tri Phi; Sports Editor Skull and Bones, '26; Manager Baseball, '26; U. of Richmond Club; Vice-President Athletic Association, '26-'27; Y. M. C. A. "Art is long, and life is short."

Although these words were voiced thousands of years ago by the great Hippocrates, they were the proverbial shot heard around the scientific world in that the realization of the great tasks ahead with so brief a span in which to accomplish them was made manifest. By reason of analogy founded upon four years of contact with a fellow student, I think one can justly say that this exhortation has to some degree found a realization in "Lumpy" during these four years at the Medical College of Virginia when one has taken cognizance of his fine scholastic record, the host of friends he has made, and the numerous other roles he has played in student life. We all join in wishing him abundant success and happiness as he casts his anchor in the harbor of scientific truth.

HARRY ELMER BEARD
NORTH KENOA, OHIO

Theta Kappa Psi; B.S. Degree.

Coming from a small Ohio town to school, this frail appearing youth was dextrous and expectant of learning medicine. His younger days were spent close to a doctor's office, and from this fact, along with that of an uncle who was a doctor, this gentle reader, I can say was his impetus for studying medicine. At first Harry was shy, even in class he was very much so. With the women he wasn't so timid, and through these years he has made quite a sheik of himself both in Richmond and in his home town as a "crusher," his winning ways seeming to captivate the fair sex. As I have said, he was very timid, and having known him for several years, can say it has only been recently that he has found himself and retained the capacity of memory and forwardness of speech.

He has made good so far, and to him goes my wish for success, and from appearances he will have it. A successful future is predicted for him.

MEDICAL SCHOOL
On the morning of September 12, 1923, an elongated country youth, having left his home and fireside, arrived in the city of Richmond, the Gateway of the South. He came from the region of the true Anglo-Saxon blood, being imbued with the true Anglo-Saxon love of beautiful women, wine, and song. He, a true Southern gentleman, demonstrated by his chivalrous attitude toward the fairer sex (get out and walk). Tom, otherwise Broadway Rose, spent four and one-half months in the Anatomy Hall in quest for knowledge by consistently and diligently listening to the Tale of Two Cities told by his unknown friend, who later became known to him as the great story teller from Church Hill. Bowyer, during his sojourn here, has proved himself to be a diligent student, and has made for himself many friends both in the professional as well as in the social world, and we predict for him a successful career in his chosen profession.

Hendrick Altamont Bracey

Bracey came to us from Randolph-Macon College, where he stood ace high, both for his scholarship and punctuality in all things pertaining to college life. He had not been at M. C. V. long before, as a result of his profound interest in Anatomy and Neurology, the affectionate name "Ostereude" was attached to him. It has stuck through the four years of his medical career. He is very popular both with the faculty and with the student body.

Because of the fact that he has never cultivated a fancy for "wine and women," and because of his ability to master all subjects pertaining to the art of medicine, especially those of neurology and nervous diseases, we predict for him a very successful future in the field of nervous and mental diseases. We certainly have the best wishes of the Class of '27, and we hope that he may soon master all of Dr. Ostereude's charts on the nervous system of women and put his knowledge into practice. It is a wonderful field, and surely success awaits "Ostereude" Bracey.
SENIOR CLASS

WILLIAM TURBIN HOLLAND BRANTLEY
ROANOKE RAPIDS, N. C.

Phi Beta Pi; Pre-Med., Duke University; President Sophomore Class, 1924-25; Roanoke Rapids Hospital, Summer 1925; Instructor in Anatomy and Physiology, M. C. V. School of Nursing, 1925-26; Interne N. C. Tuberculosis Sanitorium, Summer 1926; Instructor School of Nursing, M. C. V., 1926-27.

We would like to elaborate on this man, but lack of space, time, and descriptive adjectives stare us in the face. He is one of those most fortunate individuals possessed of the ability to know what to do and then the added ability to do it. "Pop" is quite an eloquent orator. Whenever there was a class meeting he was always the first to take the floor, and after much good advice, tips from the "profs," dills, etc., he would always close by saying, "I love you all." Always optimistic, ever thoughtful of others rather than himself, with a heart bigger even than the state of North Carolina, there is nothing he would not do for a friend so long as it is right.

"Pop" Brantley, with his magnetic personality, unquestioned character and big heart, which have made us all love him, is assured of success.

HARVEY CHRISTIAN BROWNLEY
NORFOLK, VA.

Ph.G.; Kappa Psi; Theta Kappa Psi; Interne Club; W. & M. Club; Interne Sheltering Arms Hospital, 1926-27.

After finishing pharmacy with high honors, "Our Hero" looked around as did Alexander the Great for more obstacles to overcome. He finally decided to overcome the art of medicine, and since then all efforts have been directed toward that end.

"Apex," by the high standard you have set both in the clinic and classroom, we know that all your efforts will be crowned with success. The Class of '27 bids adieu to one of its most worthy sons. May the best of luck be yours.

MEDICAL SCHOOL
SENIOR CLASS

L. W. Bryce
RICHMOND, VA.

Phi Rho Sigma; Interne Hygeia Hospital; E. L. E. S.

Lyle Woodruff Bryce, better known as "Pop" Lyle, attended Richmond University in 1921 to 1922. He was greatly interested in biology, and studied extensively on Virginia Beetles. He came to M. C. V. in 1923, and has been here ever since. He is an earnest worker, and has made a host of friends since he has been here. He has been an interne at the Hygeia Hospital since 1925. We hope Lyle will be the same kindly gentleman when he starts in his life work as he has been here. We predict for him a great future.

Finley Bryce Campbell
PLEASANT CITY, OHIO

A.B. Degree.

Campbell came to us four years ago from Ohio, with a desire to enter the medical world. His quiet, retiring manner has prevented our becoming well acquainted with him, but to know him well is to like him well. He is known to be a man "set in his ways," and is not easily changed from his point of view.

Campbell, we wish for you every success in your chosen profession.

MEDICAL SCHOOL
Garland Norfleet Carter
Boydton, Va.

Phi Beta Pi; Vice-President of Junior Class; R. O. T. C.; B.S. Degree.

"Doc Carter", although quiet on first acquaintance, is extremely likeable and considerate, with a sincere personal interest in friendships. In our inner soul we have no doubt about his success in the future—whether it be fishing or hastening to numerous patients.

True to his friends, sincere in his motives, solid in his character. All in all—"Doc"—a prince of a good fellow.

Valentino Caso
New York City
Ph.G.; A.B.

Caso hails from that rushing, bustling metropolis, New York. Where the mad rush of humanity tramples many in its wake, one often wonders how he escaped the surging masses. Quiet, unassuming, and diligent—those are but a few of the salient features which make us admire Valentino.

Little is there in Osier or Williams which has missed his critical eye. We often hear the cry, "Here comes Dr. Osier Williams Caso."

To be sure, success will be his.
SENIOR CLASS

JOSEPH VINCENT CASTAGNA
Baltimore, MD.

Interne Mercy Hospital, Baltimore, Summer 1925; Interne Club; Interne at Memorial Hospital, '26-'27.

Someone has said, "Continued good humor is a sign of intelligence," and Joe Castagna being a fellow of good humor, and the same things equaling the same thing make each other equal, so the conclusion is drawn that Joe is an intelligent fellow, for he always has a smile for everyone he meets, and no one can accuse him of being a "grouch." He is easy to look at, and we like to do things that are easy.

Castagna is a hard worker, and comes from the beautiful state of Maryland, where the valleys are full of corn. We know he is "cornfed" by the way he can fight. (We mean the corn that grows on the ear, and not poured into a bottle). He is good caliber, and we feel sure that he will do well.

DANA LAWRENCE CAVENDISH
RAINELLE, W. VA.

Alpha Kappa Kappa; University of Richmond; West Virginia Club.

"Lord" Cavendish is another of those rare and pleasing specimens of humanity from the hills of West Virginia. Even though we have been intimately associated with him for the past four years, at times we feel that we do not know him so well because of his deep character and originality.

During our struggle for the coveted M.D., Cavendish has always been a consistent fellow struggler, and "pulls with the gang" with his characteristic mountain spirit. His optimism, congeniality, ability to make friends, and his loyalty are but a few of his outstanding traits.

Our confidence in him is well placed. With his courage and ability his success is assured.
SENIOR CLASS

RALPH WAYNE CRAMER
WASHINGTON, D. C.

Alpha Kappa Kappa; B.A. Degree.

Washington is responsible for this product, and she should be proud of him. Ralph joined our class after having made an enviable record at George Washington University, where he obtained his B.A. degree and took two years of medicine. His attributes as a student have been well demonstrated during his sojourn here, and M. C. V. will be proud to point to him as a product of her teaching.

RAYMOND H. CURRY
HAMLIN, W. VA.

B.S.; Phi Beta Pi; Delta Theta Chi.

The man pictured here who is now a member of the vast legion of "Members of the Healing Art" was born and raised a true mountaineer—from the sunny slopes of the mountains of West Virginia. Here, no doubt, our friend Raymond was first introduced to the first vision of being a doctor through the fact that they are scarce in his neighborhood, and then he likes also to be called "Doc".

He isn't much for athletics in general, yet we understand there are several sideline sports he is quite adapted to. He is particularly popular around the opposite sex—they say. Raymond is very studious, and is an excellent student. He is a worthy friend and true in all respects.

And in reference to his career we all hope and wish that it will be as successful as his school work has been. Here is wishing luck and happiness in his chosen profession.

MEDICAL SCHOOL
Henry Charles Davis
HONAKER, VA.
Chi Zeta Chi; Honor Council, 1926-27; Southwest Virginia Club.

This youth comes to us from the Bluegrass section of Southwest Virginia. He joined us in the anatomy hall in the fall of '23, where he diligently mastered Gray and Cunningham. It was then that we learned what a true friend we had in Davis.

Sincerity, determination, ability, and all the qualities of a man are responsible for his excellent standing in his class. In him we have a companion whose earnest work, as well as a pleasant manner, make him fully creditable for the high esteem in which he is held by those who know him.

We wish that he could be with us longer, but such is impossible, and we'll retain our memories.

"A gentleman, student, and a ladies' man."

James Foxworthy Davis
FLEMINGSBURG, KY.

Phi Rho Sigma; Secretary of Phi Rho Sigma.

James Foxworthy Davis, "Jimmy" for short, hails from Kentucky, the habitat of colonels, beautiful women, fine horses and better liquor. Of course a few other fine things came from the Bluegrass sector, as evidenced by Jimmy. He came to us from the University of West Virginia. Since he has been with us he has pluggcd along against the difficulties which beset the "Medico" with a grimness which does credit to the rugged mountains of the western state. We are sure that after he is out of school he will attack his problems with the same determination and hew for himself a place in his chosen field.
In September, 1925, there headed east from the Lone Star State one Denman, who has proved himself a real acquisition to our class.

More familiarly known as "Texas", he has shown himself to be endowed with certain characteristics of the ranger. Although residing in the west end of the city, he never boards a car or bus en route to classes, preferring to walk, and that he does to perfection.

Denman is a handsome fellow, but his studies have never been enhanced by his good looks. He is punctual at classes, attends closely to the lectures, and manages always to steer above the 90 mark.

The Guthrie Hospital of Huntington, W. Va., found him so willing and ready to serve in any emergency as intern during the summer of '26 that they are glad to welcome him back as house physician upon his graduation.

The call of the prairie cannot be resisted, and after next year "Texas" will go back home to practice his chosen profession. We wish him all the success he so justly merits.

Harry's stay among us has always been of the pleasantest variety. Liked by everyone, he goes into the world of medicine carrying the good wishes of all his associates. Though he never does his own shouting, his work will be that kind that will win recognition—with someone else doing the bellowing for him.

One of the mysteries of his existence—where did he get the time to prepare all those wonderfully typewritten notes? Perhaps a certain Queen of recent memory can clear up the mystery. Time alone will tell.

He is persistent, reliable, dependable, and steady as an anchor in a pinch. We give him our best wishes.
SENIOR CLASS

ROBERT L. EASTMAN
FREDERICKTOWN, OHIO
Phi Chi; Phi Delta Theta.

Above, ladies and gentlemen, we have none other than "Bob" himself. His numerous good qualities have made him a host of friends, both in the school and in the city—and there is no doubt in the minds of us who know him that he will continue to make hosts of friends in the larger field of his profession. He is a quiet, gentle, good-natured fellow, who does but little talking and lets his actions speak for themselves. Always ready to do a friend a favor and give aid to the needy, Bob is certain to make a name for himself in his chosen profession. But do not think that this solemn looking gentleman is always serious. He throws off this mask when needs be, and then it is that we all secretly envy Bob and the case with which he conquers feminine hearts. There is no better sport in the class, and whether "Lady Luck" is with him or against him, you may expect great things from this young gentleman.

JOHN ROLAND ELLISON, JR.
SUFFOLK, VA.
Phi Chi; Sigma Phi Epsilon; German Club; B.S., Wake Forest College; University of West Virginia Club; William and Mary Club; Wake Forest Club.

Here we have a man who wandered considerably before coming to M. C. V. First, he went to the University of Virginia, then to William and Mary, then to the University of West Virginia, then to Wake Forest, where he took two years of medicine before he came and took his last two years with us. Jack has made us a fine friend and a good student. One might think that peanuts would be his hobby since he hails from Suffolk, but not so, as he seems to be much more interested in ladies, especially in one at Hollins. In fact, we believe Jack is actually in love, if we have interpreted the signs and symptoms correctly, and if Hollins were not so far away, we're sure he wouldn't spend any week-ends in Richmond. We're sure Jack will be a mighty successful doctor, and we predict a brilliant future for him; he has plenty of ability and he's a good scout.

MEDICAL SCHOOL
S. Charles Feldman
Baltimore, Md.
Phi Lambda Kappa; Director of School Orchestra, 1926-27.

S. C. Feldman, otherwise known to us as "Sir Charles", due to the respect we have for him.
Baltimore sent us a wonderful friend and classmate, an excellent student, and active college man. In
the person of "Sir Charles" she shall receive in return a young doctor who we feel will be a credit
to his community, city, and profession.
He has organized and directed the college orchestra, which is well known throughout the city.
He has made his way through college without any financial backing. Ambition, perseverance,
success. Go to it, Charlie. You're heading for victory.

Vincent Justus Felitti
New York City, N. Y.
A.B. Degree.

Vincent was born in New York City, and that's one of the reasons why he is destined to be a
great man. He has served in the world war and has emerged with a distinguished record. His
scholarship in our college is equal to that of the best in the class. Always smiling and happy, Vincent
has won the friendship of all his classmates. Somewhere in his heart he has locked away an ambition
to specialize in gynecology and pelvic surgery. From what we know of Vincent, we are assured
that he will make good. Here's luck to you, "Vin."
SENIOR CLASS

Herman Stuart Fletcher
Richmond, Va.

Alpha Kappa Kappa; K. of C. Club; University of Richmond Club.

"'Fletch' has had a heart as mellow as an apple overripe;
Hear him stag and tell a story, snap a joke, ignite a pun;
'Twas a capture—capture—glory, and explosion—all in one."

A good man, scholar, and gentleman, one of our boys from the University of Richmond, and a resident of Church Hill. Already a practitioner of several years' experience, Fletcher will probably specialize in obstetrics. However, it is thought that he might wish to do a little research work in his first love, Pathology.

Wanted—"A Wife."

Jose R. Garrido Collazo
Rio Piedras, Porto Rico

Knights of Columbus Club.

Garrido came from the beautiful island of Porto Rico to make his career. Like most Spaniards, he is temperamental, very fond of girls and the theater. His psychology is somewhat complex, and it is difficult to know him at first; however, as one becomes more intimate with him, one finds that he is an idealist and at times a radical man. A constant visitor to the library, fond of good books, and very alert; he keeps abreast with the times and with new methods in the study of medicine. Always reading and observing, thus increasing his knowledge, until sometime he will become a good diagnostician.
Seth Gayle, Jr.
RICHMOND, VA.

Sigma Phi Epsilon; Phi Rho Sigma; Class Basketball, '24, '25, '26; German Club; R. O. T. C.; Interne Club; Virginia Club; Interne Hospital.

When we reached here as "green" freshmen we found Seth waiting to welcome us to this his native city, and during our stay here he has at all times been willing to give us the benefit of his intimate knowledge of the surrounding terrain.

In all branches of class activities Gayle has been among the first—scholastic, athletic, social and military. In the last capacity he brought back to M. C. V. one of the ten "commendatory mentions" given in the 1925 R. O. T. C. camp at Carlisle Barracks. We understand that his plans for the future are centered around the medical corps of the U. S. Army, in which he has received an appointment.

In bidding adieu to this true friend and pleasant companion, our wish is for the fullest measure of success which we feel assured is waiting for him.

Louis Holmes Ginn, Jr.
BERRYVILLE, VA.

Kappa Alpha; Phi Rho Sigma; R. O. T. C.; Vice-President Sophomore Class; Hampden-Sidney Club; V. P. I. Club; William and Mary Club; German Club; Business Manager Skull and Bones, 1926-27.

Ginn is really a higher percentage than his name would indicate, but you know "Ethyl" would be such an odd name.

Quite a number of notables have been produced and developed by the good old Virginia town—BERRYVILLE. Needless to say, Ginn is one of the same in the making, having risen from this proud little borough. Byrd is BERRYVILLE's navy man, and we believe Ginn will become her army man who accomplished things. In the annals of the traditional old M. C. V. Hall of Fame, Ginn has made a perpetual impression. Needless to introduce by descriptive qualifications—we all understand and realize this young man to be of sterling character, magnetic personality, and above all, an individual.
SENIOR CLASS

ARNOLD JARRETT GIVEN
CHARLESTON, W. VA.

Phi Sigma Nu; Phi Beta Pi; B.S., West Virginia University.

Arnold came to us this year from the University of Cincinnati, and we feel that our class has been boosted in more ways than one by his presence. He originates from the state with many lofty peaks, namely, West Virginia. His sincere and welcome mode of expression has caught many a friend, each of whom know him as one who is earnest and always striving to get the best. There must be something unknown to make a man climb like this, so for an explanation we simply refer you to the expression used by our man in surgery, "A woman is behind every lick that is struck." Good luck to you, my friend; we know that success will be yours.

MARTIN H. GREENFIELD
BROOKLYN, N. Y.

Phi Lambda Kappa; Class Representative; Skull and Bones, '26-'27; M. C. V.; Orchestra, '26-'27.

After getting his pre-med. in the wilderness of New York, Martin migrated South with the birds to take his medical course.

During his stay here he has made many friends, and as the old saying goes, "the longer you know him the better you like him." Martin claims the honor and distinction of being the first Freshman to raise a little "fuzz" on his upper lip. Besides being a good fellow and an excellent student, Martin possesses that which few attain; his talent for music and his work in the poetical field are yet to be surpassed.

We wish him success both maternally and professionally.

MEDICAL SCHOOL
Earl Joseph Haden
East Leake, Va.

Phi Beta Pi; A.B. Degree; Interne City Home Hospital; Interne Club.

Earl is another of the boys from the environs of Richmond, and is upholding successfully the reputation of our capital. Four years ago he came to us from Lynchburg College and since then has proven that his reputation as a scholar has a firm basis. Far be it from him, however, to forego the broadening influence of social life. "Tis rumored that broken hearts abound in Richmond, and that Dutch smiles are in vogue at the Nurses' Home.

Earl has shown himself to be a good sport, a scholar, and a thinker, and we feel no qualms in predicting for him a glorious career in his chosen profession.

We wish him the best of luck in all things, and are sure that in after years he will be in the ranks of those of whom we say, "He and I were classmates once."

John Richard Hamilton
Clarksburg, W. Va.

Phi Chi; Student Research Council, '26.

John came to us from Ohio State and immediately entered into the life of the college. During his four years here he has been one of our leading men. Active on committees, diligent and effective in his studies, honorable in his daily life, interested and dependable in all class activities tells only a part of the story of John. In Dr. Charlie's department John has been active and has won favorable comment for his experiments, much attested by the medal he wears on his watch chain.

John is popular among the students. His opinion in class matters is respected.

"The Ball," because of the smoothness of his pate, looks wise. Well, he is, and his success has already begun.

MEDICAL SCHOOL
Leo Eugene Hayes
Richmond, Va.

Theta Kappa Psi; Vice-President Freshman Class; University of Richmond Club; K. of C. Club.

To know this man is to appreciate him. At no time during his four years at M. C. V. has he failed to impress both faculty and students with his admirable qualities.

Possessing the rare combination of keen reasoning power with diligence and determination, he early impressed everyone with his unusual intellectual ability.

Truly it can be said of him that he is the scholar of the class, so frequently has he lead it in scholastic attainment. He is quietly reserved, reasonably dignified and, notwithstanding his thinning hair, is exceedingly handsome.

In him we find a genuine friend, a lovable companion and a real man.

Like the men who, departing, left their footprints on the sands of time, so will the departing of Hayes leave its imprint upon the lives of his associates in the Medical College of Virginia.

William Carey Henderson
New Canton, Va.

Skull and Bones Staff, '25, '26, '27; X-Ray Associate Editor, '27; Y. M. C. A. Cabinet, '25, '26, '27; Editor Student Research Council; Student Volunteer Group; Class Historian, '27.

A discussion of Carey's attributes and characteristics would indeed be commenced incorrectly were it not begun with some expression of his altruistic motives in all his dealings with his fellow students as well as others. We have found him a staunch friend with a ready sympathy and a willing hand, always glad to do more than his part in every way towards promoting the best interests of his associates and his Alma Mater. To prepare himself more thoroughly for such a future life of service, Carey first obtained his B.A. degree and then spent a year in teaching before casting his lot with us. With his reserved, self-confident, yet unassuming manner, his mature judgment and independence of thought, and his earnestness to serve, the foreign mission field cannot but hold for him what we all wish him and what he justly deserves—success.
SENIOR CLASS

CHARLES ROY HOSKINS, JR.
SALUDA, VA.

Phi Chi; Sigma Alpha Epsilon; Chi Beta Phi; B.S. Degree, College of William and Mary; Scholarship First Senatorial District.

In every group of men there are three general classes—the first, a few who lead; the second, the majority who are content with an average display of ability; and third, the small crowd which is satisfied with "merely getting by" with a minimum of work and reward. This little gentleman of whom we write has from the very first "demonstration" been outstanding in his desire to learn and the ability to give back what he knows. Roy is a rare combination of perfect sobriety, is calm in demeanor, and not demonstrative. He gives one the impression of having power in knowledge and faith in himself to meet the demands of his profession. Ready always to enjoy a good joke or tell one, or be serious and learned as well, versatile in habit and choice in company, he is a man from whom his profession may well expect great things.

WALTER ODESLY HOUSE
NORFOLK, VA.

Omega Upsilon Phi; Square and Compass; X-Ray Representative, '26-'27; Assistant Business Manager X-Ray, '26-'27; Ph.G., M. C. V., '21.

Hailing from William and Mary College, Walter came to us with a prominent past, and during his stay with us has made himself an outstanding member of our class. Not only did he serve in the navy as pharmacist's mate during the world war, but also graduated in our school of pharmacy in 1921.

He has made a good scholarship record, and has been one of our most popular classmates. A wonderful personality, winning smile, and a thorough knowledge of medicine and pharmacy makes him one of the best prepared men for a successful professional life.

MEDICAL SCHOOL
SENIOR CLASS

JOSEPH WARREN HUNDLEY, JR.
RICHMOND, VA.
Pi Kappa Alpha; Phi Chi; B.A., University of Richmond, '23; German Club; Interne Club; Interne Tucker Sanitorium, '26-'27; Class Athletic Representative, '25; Class Basketball, '23, '24, '25; R. O. T. C.

It is an asset to any man to be able to claim the friendship of Warren Hundley. To have been associated with him for a number of years serves but to emphasize his real worth. While thorough pre-medical education, as indicated by his B.A. degree and his scholastic record, may to some extent account for his success in Medical School, there is no doubt that his determination to offer to the world the best services possible, has been an even greater factor. With such aspirations it will be impossible for him to remain in the lower ranks of the profession. The outstanding trait in the character of this man is his absolute honesty. He is honest with himself by developing the mental, moral and the physical sides of his being. He is too big to do anything in a small way. He is an honor to his school in athletics, in class work, before patients, and before the public. He is as honest with the profession in that he avails himself of every available means to learn those facts by which the world may be a more pleasant place in which to live.

ARTHUR DIXON HUTTON
GLADE SPRING, VA.
A.B., Emory and Henry College; Member of Emory and Henry Club; Member Southwest Virginia Club.

"Dick hails from the great open spaces of Southwest Virginia. Coming to M. C. V. in 1923, after having worked for two years as technician in the George Ben Johnston Memorial Hospital." Abingdon, Va.

"Dick", who has done good, consistent work, has ranked high in the esteem of his classmates and professors. He is a great admirer of the opposite sex, and from all appearances his soulmate awaits his return to the Southwest with open arms.

We predict for "Dick" a financial success as well as a professional one, as he is endowed with the talent of carefully handling his funds.

Old boy, the best wishes of the Class of '27 are yours, and may you succeed in every undertaking, and reflect honor to your Alma Mater.

MEDICAL SCHOOL
SENIOR CLASS

CARL C. JACKSON
BIG CHIMNEY, W. VA.

Phi Beta Pi; Phi Sigma Nu; B.S., West Virginia University, 1924.

"Jack" is a product of the West Virginia hills. He started his medical career with four years work at West Virginia University, which entitled him to a degree in Bachelor of Science. When he came to us last year we watched him with an eagle eye, but could not understand his peculiar affliction—silent only when called upon, but always ready with a good answer for Dr. Coleman. By Jack's quiet and subdued nature he has won the good fellowship of his classmates, and we are sure when he goes out to practice the science and the art which he has so faithfully studied, that he will win the same fellowship of the laity, and his success will be that of M. C. Y., will be proud to claim.

LEO LEMMER JACOBS
RICHMOND, VA.

Square and Compass Fraternity; Phi Delta Epsilon; Students Research Council; Norfolk Protestant Hospital, Summer 1926; University of Richmond Club; R. O. T. C.; Interne Pine Camp Hospital, 1926-27; Interne Club.

"Jake", as he is known, is an "inmate" of Richmond, and came to us early in 1923 after doing his pre-med at the University of Richmond.

In the four years of his stay here we have come to know Jake as he really is. He has shown himself by his ceaseless efforts and untiring work not only to be a good student but a man imbued with the spirit of medicine. He likes his fun, but he takes it with moderation.

As he leaves us, we, his classmates, know that Jake will make a success in his chosen field of medicine.
SENIOR CLASS

EUELL CLAUDE JAMISON
BOONE MILL, VA.

Phi Beta Pi; Pre-Med., Roanoke College.

"Jimmie" well represents Roanoke College. He is rather quiet in disposition but very aggressive. His work has proven that anything worth doing is worth doing well, whether it be for his class, society, friend or fraternity. He is very active in all forms of college activity, not only in his studies and in helping his friends to prepare for quizzes, but he is seen to be very lively on the ballroom floor and in other social affairs. In starting the study of medicine he acquired the good habit of being loyal to his work, and has always maintained a high average in his grades. In knowing him he impresses you with the confidence that you have a true friend. His sincerity in his work, his high standing in social events, with his personality and his ability to accomplish good work point toward success, for which we extend our best wishes.

ELIOT WESLEY JOHNSON
KIPLING, N. C.

Chi Zeta Chi; North Carolina Club.

"Johnnie" came to us from the University of North Carolina after completing his academic course. He has proven himself a man of the highest character. During the four years he has been at M. C. V., he has made a record of which we are justly proud. He stands for high morals and noble ideals, catering only to those things which make for the best citizens.

We know success awaits him wherever he locates in the practice of his chosen profession.

MEDICAL SCHOOL
SENIOR CLASS

JEREMIAH ROBERT JOHNSON
Winston-Salem, N. C.
Chi Zeta Chi; B.S. Degree.

"Doc" came to us at the beginning of our junior year from Wake Forest College. He has proven himself a student of exceptional ability, a true friend, and a polished gentleman. During the world war he served his country with the Thirtieth Division. He is quiet and retiring in his manner, yet forceful when the occasion demands. With his high ideals and kindly disposition, we know that success awaits him in the practice of his chosen profession.

We understand that after leaving M. C. V. he intends to practice medicine "down home" in the Old North State. We wish you every success, Old Man, and may you always carry with you the teachings of your Alma Mater.

SIDNEY FOWLER JOHNSTON
East Radford, Va.

Phi Rho Sigma; German Club; Honor Council, 1925-26; Internes Club, 1926-27; X-Ray Representative of Senior Class, 1926-27; Overseas Club; Southwest Virginia Club; Washington and Lee Club.

Upon entering the Medical College four years ago we found in our midst a man with the earmarks of high character; a product of Washington and Lee University, whom we soon learned to know as "Sid." He lost no time in winning his way to the first ranks in scholarship and popularity among his classmates, just as he won recognition and admiration while fighting with the Marines in France during the world war.

Sid is a thorough student, a loyal friend, a true sport, and a perfect gentleman; and seems to acquire knowledge and possession without effort.

Endowed with the qualities which lead to success, being born of that blue-blooded stock which Virginia reveres, we predict for him a bright and useful future.

MEDICAL SCHOOL
Orvin Clarence Jones
RICHMOND, VA.

Phi Chi; Varsity Baseball, 1924-26; Varsity Basketball, 1924-25; Captain Class Basketball, '23, '24, '25; Athletic Council Representative, 1924-25; President Athletic Association, 1926-27; University of Richmond Club.

This promising young doctor of high morals and noble ideas is one of Richmond's products, and is a fair sample of his home-town citizens. He came to M. C. V. from Richmond College four years ago. He has undergone many a hard task since arriving, and has never been found wanting. We are indeed glad to have him as a member of the Class of '27.

"O. C." has not only been a conscientious student whose aim is to obtain the best, but he also attained high honor in the athletic world. He has played on the varsity team for four years while at M. C. V., and during his last year was president of the Athletic Association.

Through his untiring efforts, we are sure that such a man will gain high recognition in his life's work.

Oliver L. Jones
POWCAN, VA.

Chi Zeta Chi; Intern at Norfolk Protestant Hospital, Summer 1926; Tidewater Club.

It was with high regard that we watched "O. L." work among us, and our associations with him have been a great pleasure. We feel that a great man has been added to our alumni, and that he will win much success for himself and his profession. We wish him every good thing that life may hold for him.

He has been a consistent student and his progress has been steady while here. At social functions he is one of the favorites, especially with the ladies.
SENIOR CLASS

WILLIAM SAMUEL JONES
NASHVILLE, N. C.

Theta Kappa Psi; B.A., Wake Forest College, 1925; North Carolina Club.

Sam entered the Junior Class of M. C. V. from Wake Forest College determined to get his M.D. It didn't take us long to get acquainted with "Fireman" Jones, for he is neither hard to see nor is he undernourished as a student. We know Sam well, but our acquaintance with him reveals very little that is not honorable. He is cheerful, a hard worker, and a gentleman. He has very few bad habits, and is an exceptionally clean young man.

Sam is very practical and conscientious in his work, and has the rare ability and personality of instilling confidence in the patients he deals with in the hospital.

We sincerely wish you a very nappy future, Sam.

JAMES W. KEEVER
HICKORY, N. C.

Phi Chi; Editor-in-Chief of School Publication; Pi Kappa Alpha Social Fraternity; Instructor in Psychology; Lieutenant, A. E. F.; German Club.

Jim was born in Hickory, N. C., the good old "Tar Heel" state, and well has he supported the traditions of his predecessors who have gained their profession within the halls of M. C. V. He prepped at the Lenoir-Rhyne School in his home town, and then entered the University of North Carolina. At the outbreak of the war, Jim left his work here to serve his country with the Pioneer Infantry overseas. He saw actual service in the battle of Les Mons, where he was gassed. Being returned to this country, he resumed the pursuit of his medical preparation, only to be interrupted by a setback his spending some months at the U. S. Army hospital in Johnson City, Tenn. With that cultivating determination of a soldier, he gained ground over his physical disabilities and was able to enter the University of Pennsylvania for his first year in medicine. He then came to join us from that institution, and on his arrival joined into the politics and activities of his latest chosen college. Four years he has stuck with his class under adversities at times, and on the wings of ethereal enjoyment at others. He has proven himself to be a man liked among men—ambitious, energetic, and with those sterling qualities of manhood and gentlemanly charms that the public admires and loves in a medical doctor.
SENIOR CLASS

LOUIS S. LEO
TAMPA, FLA.

Phi Delta Epsilon; Assistant Art Editor X-Ray, '24; Art Editor X-Ray, '25-'26; Associate Editor X-Ray, '26; Student Research Council; Interne Club; University of Richmond Club.

"Lou", as he is known, hails from Florida, where everything grows, including coconuts and geniuses. After staying with us for four years we know that his work both as artist and student has won for him the admiration and respect of the entire school. With his reputation as a student and his personality, we, the Class of 1927, know that Lou will make a success in any field of medicine that he chooses. With this we wish him good luck in his specialty after he leaves us.

Athey Ragan Lutz
ORKNEY SPRINGS, VA.

Phi Rho Sigma; Honor Council, 1923-'24; Skull and Bones Staff, 1925-'26-'27; Athletic Council, 1926-'27; Varsity Tennis Team, 1924-'25-'26-'27; R. O. T. C.; Interne Club; University of Richmond Club; Y. M. C. A. Cabinet, 1926-'27; X-Ray Staff, 1927.

The curtain falls on this the last act of a great drama, and we prepare to take our leave of friends and fellow students. Friendships that we have nurtured in hourly contact in these four years of striving toward a common goal. The retrospect of these years recalls to memory many cherished ideals. Chief among these are our friends. "Bill", better known as Athey, has unobtrusively won his way to the hearts of those who have known him. As he goes out to practise the art and science of medicine, we know that there will be no weakened link in his chain of success. He will uphold the ideals of his profession, even as he has upheld the ideals of student life. His sojourn with us has been exemplary of all that goes to make a doctor. His scholastic record is enviable, but not at the expense of social, physical, or spiritual neglect.
Here's to the "Silent Man" who hails from the great "Old North State," where so many men of real worth have come from. He is one of those who leaves his work to speak for itself rather than to boast of his achievements.

"Still waters run deep" has been phrased for ages, but was never more appropriately applied than to our highly esteemed friend. His depths have not as yet been sounded; he is like a placid pool which contains untold treasures within its depths. He is an ideal type of friend, keeping his own affairs tightly locked in his own bosom, and is never inquisitive about his fellow man's.

Lynn, we wish you success in whatever field you may enter. It will be yours, we are confident, judging by your faithfulness to all those duties which have been imposed upon you in the past.

"Mac" is one of our delegation of big boys from Wake Forest. Coming to us last year, he soon became one of us and one of the jolliest of the lot. He has an exceptionally fine character and is a good mixer.

"Mac" practiced pharmacy in the "North State" for a period of eight years before he decided to study medicine. He was also with the medical corps of the U.S. Navy during the world war. His former practical experience and the faithful attention he has always given his patients here, combined with a natural ability and a thorough knowledge of medicine, leads us to predict a very successful future for him in the practice of medicine in his home state.
SENIOR CLASS

JOSEPH TECUMSEH NUNS McCASTER
RICHMOND, VA.
R. O. T. C.; B.S.

"Mac" is what we know that damn Yankee above by. He came to God's country and here received his preliminary training at the University of Richmond. For four long and laborious years he has struggled with us, bearing our ups and downs with a true spirit. Some of us feel that we hardly know him, yet we who have penetrated the outer shell of a quiet and pensive character know him to be a warm friend of genuine worth. As the future in all its splendor passes each of us, we feel that this happy and cheerful disposition shall forever be with us. We express our good wishes for abundance of success and renown.

WILLIAM LUTHER MADEIRA
MORGANTOWN, W. VA.

Theta Kappa Psi; West Virginia Club; B.S., West Virginia University, 1925.

Madera came to Richmond after completing his first two years of medical work at the University of West Virginia. Although apparently indifferent to the ladies, we believe he has been led astray of late by the extensive sheltering campaigns conducted by his handsome, though alopecic roommate. "Bill" is an ideal student, a fine fellow, and one who deserves all that has been bestowed upon him. We are assured of his success and certain that he will reflect credit on M. C. Y., and the Class of '27.

MEDICAL SCHOOL
CHARLES B. MARTIN
CONCORD, VA.
Alpha Kappa Kappa.

C. B. Martin, who is more familiarly known to his classmates as "Charlie," entered the portals of the Medical College of Virginia after completing his pre-medical work at William and Mary College. Charlie is quiet and reserved in his manner, verifying the old saying, "Still waters run deep." He has made a record here of which M. C. V. is justly proud. With his high ideals and lofty disposition, we know that success awaits him in his chosen profession.

We wish you every success, and may you always uphold the true, chivalrous principles for which you have stood during your stay with us.

CARMAN I. MARTIN
MAYSVILLE, W. VA.

Theta Kappa Psi; B.S., West Virginia University.

Carmen entered the Junior Class after having taken his first two years at the University of West Virginia, but has quickly endeared himself to all that know him. Some feel they hardly know him yet we who have penetrated the outer shell of his character know him to be a warm friend and a worthy acquaintance.

His friendly smile and frank, open face inspire our confidence in him, making us feel that he really knows the subject on which he is conversing and can tell us something worth while. He has proven to be a hard working, conscientious student—hence we know that success awaits him in the future as he goes back to West Virginia. His future patients will welcome him with the same confidence in his ability to help them as we have had in him here at school.
SENIOR CLASS

Blake Walden Meador
Richmond, Va.

Phi Beta Pi; University of Richmond Club; German Club; Business Manager X-Ray, '26-'27; Interne Summer '26, City Hospital, Portsmouth, Va.

What happy associations this enagle cognomen conjures as we gaze into Time's crystal through the mist of the years. Nature compensated for his youthful figure with a deep voice, basso in pitch, and transmitted to all parts of the universe at roll call.

Having a high resistance against feminine charms, frantic mothers will long favor him for frenzied daughters' "affaires de coeur." His irresistible smile added to the zest of life and subtracted much from the sting. And there was his Cottij wit which enabled him to see the humor of it. Beneath such a nonchalant demeanor there resided a subtle philosophy. We commend him to all suffering humanity.

Frederick Ulmer Metcalf
Roanoke, Va.

Chi Zeta Chi; Technician Children Memorial Clinic, 1925-26-27; William and Mary Club; Southwest Virginia Club.

"Runt" hails formerly from Wisconsin, but at present resides in Roanoke. He came here from William and Mary College, having acquired a monogram in athletics while there.

Since his entrance into medicine, he has proven himself a thorough student, a clean-cut gentleman, and is very popular with the student body. His popularity with the fair sex is one of the outstanding proofs of his pleasing appearance and personality. In addition to performing his duties at college he has been a member of the staff of the Children's Memorial Clinic for the past two years.

Being possessed naturally of a keen and sincere interest in his profession, and a tenacity that knows no defeat, we predict a brilliant future for him.

Medical School
"Pete" came to us in September, 1925, after having made for himself a name at the University of West Virginia, of which we are certainly proud. Before taking his first two years of medicine at Morgantown, he realized that a little knowledge was a dangerous thing, so he obtained for himself a B.S. degree.

Pete, by his magnetic personality, soon won for himself here a host of close friends among the students. Being a true sport, a perfect gentleman and a handsome individual, his position with the ladies is undisputed.

As he has the stuff and the makings of a man, we are sure that old M. C. V. will be proud to point to him as a product of her teaching.

CHARLES LOGAN NEWLAND
JACKSON, KY.

Four years ago Newland, better known as "Charles", entered our ranks. He comes from the old state known for its pretty women and fast horses—Kentucky. Charles believes in doing things well, and has very faithfully discharged his duties in classrooms as well as at the clinics, ever striving to win the "old skin you love to touch"—better known as the sheepskin.

When he leaves us for his native state we are sure that M. C. V. is sending one of whom she can feel proud. His great success here will be duplicated elsewhere. Wishing you much success in your medical career.
SENIOR CLASS

MAURY CLAIBORNE NEWTON
BLUEFIELD, VA.

Chi Zeta Chi; B.S., Wake Forest College; Treasurer Freshman Class; University of Richmond; Veterans’ Club; Southwest Virginia Club; Square and Compass Club; Pi Kappa Alpha.

Big, jovial Newt came to us from Wake Forest at the beginning of our junior year. He was even at that time mature of mind. He had been with the naval aviation corps during the war, and later with a bank as cashier.

Newt soon became one of us, and is thoroughly liked by his class. The only interference with his career will be if some state insists on making him governor because of his splendidly suitable figure and not because of any lack of skill and prestige as a physician.

His matrimonial life being settled, we wish him speed in attaining his place in the medical profession.

JUAN NIEVES COLON
CIDRA, PORTO RICO

Lord Byron—and legend—tell us of a great Don Juan, fortunate in “affairs d’amour,” in duels and court intrigues. But perhaps you have not heard of this new Don Juan; though he has inherited a great deal of his romantic ancestry (there are reasons to consider the matter wholly non-pertinent) he is more appropriately a true son of the Great Father Hippocrates. His interest in the medical sciences show that he will promptly manage what we may call the “craftsmanship” of the profession. Besides, he possesses that attitude toward the medical career which old Thomas Moore called “Religio Medicī.” With this credo—the same of the Father, Laennec’s, and Osler’s, and all the great masters—and his enthusiasm for study, it is undoubted that this young member of the Asclepiade will be one of the selected few. We are no prophets, but what we have said is prophetic history.
Peter Pagano came to us from Wake Forest College, where he took his first two years of medicine. His reputation preceded him here, for it was known that he was "All-State" end in North Carolina. He was captain of the team that began to build Wake Forest's reputation for football, and aided them materially in the championships in football, basketball, and runner-up in basketball. He left there with as good a record as a student.

Here at M. C. V. he has been a leader in scholastic work, and materially aided the progress of the Junior and Senior classes in basketball. A clean-cut athlete, student and gentleman; we predict success for him. We'd like for him to turn his professional efforts southward, if we can keep him away from Ridgewood, N. J.

John Wesley Parker, Jr.

Phi Rho Sigma; President of the Class, 1923-24; German Club; Editor-in-Chief "X-Ray," 1926-27; Internes at Grace Hospital; Reception Committee Finals, '25-'26; Internes Club; R. M. Club; W. and M. Club; Sigma Nu.

In September, 1923, John came from William and Mary College. He has proven himself an asset from the start, holding some honor each year. As well as a gentleman and a scholar, he is a fellow well met with everybody. We are glad to have been a fellow student with John, and hope him success in all his undertakings.
SENIOR CLASS

JOSEPH T. PETERS
PRINCETON, W. VA.
Phi Rho Sigma; Junior Class Historian; Senior Vice-President; West Virginia Club; German Club; Interne Club; Phi Delta Pi.

The good Lord made only one Ted Peters; satisfied with this accomplishment, the pattern was then discarded. Tho short of stature and scant of hair, but blessed with a keen sense of humor and a congenial personality, this diminutive personage occupies a most prominent part in the annals of our class.

Not content with conquering medicine, he has for the past three years embarked in certain affairs of the heart, which last summer terminated with his reclassification as a benedict. Together with this new responsibility and the duties of a busy internship, Ted has already developed into a man of sound medical judgment, rare practical ability, and an obstetrician par excellence; qualifications insure success in the years that will come.

PERCY PAUL PHARR
RICHMOND, VA.
Omega Epsilon Phi; R. O. T. C.

This gentleman hails from West (by God) Virginia, where men are men, all dogs are police dogs, and all good girls have a hard time. As you would naturally expect, he runs true to form, and his native state would justly feel proud of him.

A man of few words, a doctor of medicine, and king of the city jail—these are a few of the many things that can be said of him. During these four years with us he has attained an enviable record, and we have all learned to respect his judgment on matters pertaining to medicine. It is rumored that he knows Osier equally as well as the man who wrote it, and also is a devoted student of Sir James McKinzie.

During his last two years Percy has been interne in the city jail, and has handled the situation in an admirable manner. He is a veteran of the late war when he served in the capacity of lieutenant. Well, here's to you, Percy, and we only wish our success was as assured as yours. You have proven that you are made of the stuff that wins, and success only can come your way.

MEDICAL SCHOOL
From the north side comes another Richmonder, Newton Pleasants. Having wandered from his native city for pre-medical work, he returned and began the study of medicine in 1923. Four years of association may seem a long time, but with such a man as Newton it seems short. Newton is a man that we can trust. His friendly manner has won for him a host of friends. In his daily life he lives the life of a Christian and a gentleman.

A few years, and Richmond will be proud of a young surgeon. Diligently have you sought to prepare yourself for your chosen work, and we wish you all the joy that a life of service can bring.

William Henry Powell, Jr.
FAYETTEVILLE, N. C.
Theta Kappa Psi; B.A. Degree; College Orchestra, '26.

Willie, as he is known to his many friends, came to M. C. V. after having made a splendid record at Wake Forest College; he having taken his first two years at that institution. Willie has likewise made an enviable record since coming to M. C. V. He is a good student, a conscientious worker, and a man ever ready to aid his fellow students. His record at M. C. V. has shown that he is a man who will always honor and respect his profession. His many friends at M. C. V. wish him great success, and the Class of '27 considers itself lucky in having Willie as a member.
SENIOR
CLASS

PAUL ELLIS PRILLAMAN
CALLAWAY, VA.

Theta Kappa Psi; President of the Senior Class; Secretary-Treasurer Junior Class; Member of R, O, T, C.; William and Mary Club; Southwest Virginia Club.

"His actions won such reverence sweet,
As hid all measure of the feat.
Work of his hand
He nor commands nor grieves; . . ."

Yes, he was in the big rush of '23. No, it was not for gold, but for knowledge. None other of the large Freshman class of that year prospected more steadily upon his big stiff and panned more Anatomy than Paul Prillaman. Many a hard bone was handed to him but each he mastered with ease. It was early in our first year that with that broad smile and commanding personality that Paul won each of us as a close friend, but it was after he had "knocked cold" many of Dr. Charlie's questions that we all came to admire his stability and sagacity. Prillaman has many other admirable characteristics which we wish we had space to tell of, but we shall end by saying he has only begun—the world will know him.

IRWIN RIFKIN
RICHMOND, VA.

Phi Lambda Kappa; B.S., in Medicine; Secretary-Treasurer Sophomore Class, '24-'25; John Marshall Club; University of Richmond Club.

Early one September morn back in 1923 there entered the portals of our ancient institution a light-haired young gentleman of small stature. He walked around the building unnoticed, but in the roll call in the Anatomy Hall he loudly proclaimed his presence, and from that time until now he has will specialize in O, B, because for the last two years he has worn a red necktie. Go to it, Irwin, you will win.

MEDICAL SCHOOL
SENIOR CLASS

EDMUND EUGENE ROBINSON
CONCORD, N. C.

Chi Zeta Chi; North Carolina Club; Interne Club; Honor Council Representative, '25;
President Junior Class.

Robbie, as he is better known, took his academic work at U. N. C., and then migrated to Virginia. He entered M. C. V. as a freshman in the fall of '23—dumb but eager to learn. He soon became well known and very popular among his classmates, being elected president of the Junior Class in '25. His ability as a student has been shown by his good grades, and his personality has won for him the respect and friendship of all who know him. Another big item that must not be overlooked is the ease with which he gets along with the fair sex. Indeed, I would call him a genuine "ladies' man."

A man like Robbie, who can have all these things truthfully said about him, is already a success.

PALMER AUGUSTINE SHELBURNE
RICHMOND, VA.

Phi Beta Pi; Tau Kappa Alpha; Interne Club; Interne City Home.

"Some men are born great, some achieve greatness, and some have greatness thrust upon them," so said the sage. Palmer is one of those quiet, steady, dependable chaps who gets things by working for them. Not many of us in those hectic days of cadaverology could see these months of seniority so close upon us. But the "goal" was there, and our heart was set upon it. Among the faithful, behold the man! Shelbourne, a friendly man, a sincere student, a ready, smiling and always considerate classmate of whom we may be proud to greet and call our friend.
SENIOR CLASS

WILLARD PALMER SMITH
NEWPORT NEWS, VA.
Phi Rho Sigma.

Willard came to us from William and Mary College, and she should be proud of this worthy son. While here he has been a diligent, painstaking and industrious student, and success will be his reward.

But now Willard has one failing. Truly, is Willard the landlord of Memorial Nurses' Home, for he is seen there every Saturday night sheiking that certain party.

FRANK FREEMAN SOWERS
LANDGRAFF, W. VA.
Phi Beta Pi.

"Buck" hails from the "Free State of McDowell," located somewhere in the southern clime of West Virginia. He is as good-natured and cheerful as the mother bird when caring for her young. From a physical standpoint, that of a photographer, and "Flaming Youth" in particular, he is a rare specimen, yet loved by his classmates and all who know him. His motto is, "Whatever is to be will be, if it never comes to pass."

Buck migrated from the West Virginia University in 1925 and cast his lot with the medical school of his choice. Despite his weakness, he has a clear thinking head and a generous, kind disposition, so we feel that his success in medicine is quite assured. Here's wishing him a great success.

MEDICAL SCHOOL
SENIOR CLASS

THOMAS NATHANIEL SPESSARD
RICHMOND, VA.

Phi Chi; Pi Kappa Alpha; Hampden-Sidney College; Varsity Tennis Team, 1924-'25-'26-'27; Interne Club; Secretary-Treasurer Athletic Association; R. O. T. C.; German Club; Class Basketball, 1924-'25-'26.

"Jake", who started his training for professional work at Hampden-Sidney, says they turn out some good men from small schools. We agree with him, for they sent him to M. C. V. in '23 to begin the study of medicine.

He is very professional in his athletic activities as well as other things, because he is an efficient member of the tennis team, and now seems to have become a celebrated golf player. Another way "Jake" exercises is doing the class griping, and is duly elected president of the Gripers' Club. But probably in this way, as in many other ways, he has helped his class and school.

So we all feel confident that "Jake" will soon be among the leaders of his profession. To this end at least he has the unanimous best wishes of his classmates.

WILBUR SYLVESTER STAKES
RICHMOND, VA.

Omega Upsilon Phi; Square and Compass Fraternity; Y. M. C. A. Cabinet, '23, '24, '25, '26; President, 1926-27; Student Volunteer Group; Randolph-Macon Club; Interne Club; Interne Soldiers' Home Hospital; R. O. T. C.

"Purpose is what gives life a meaning."

Unassuming and quiet, guided by the highest ideals of life, Wilbur has gone his way making friends of all. He is one of the best students of the class, a Mason, and a gentleman. In the profession he will minister not only to the physical but to the spiritual needs of his fellow man. There are very few girls in our school, but Wilbur has enough in other schools of Richmond for the entire class. His pleasant disposition and pleasant smile, as well as his abiding friendship and tact have endeared him to the hearts of the whole college. His Student Volunteer and Y. M. C. A. work have stamped him as a leader. We believe the heathen will not have long to suffer with many curable diseases after he has reached his port. We predict a 'slashing' success with the knife—Selah!
SENIOR CLASS

MALCOLM SAMUEL STINNETT
BUCHANAN, VA.
Phi Beta Pi; Interne Club.

"Mack", as he is known to his many friends, is a product of the mountain section of the Old Dominion. He came to M. C. V. four years ago, after having had his pre-medical work at Washington and Lee. At both institutions his work has been of excellent quality. His aim is to reach the standard and to lend aid to his fellow man. He has a combination of attributes which will go to mark him for a real doctor. He is a conscientious student, a gentleman of high morals and ideals, a man with a jovial, sincere personality and unhesitating manner. Along with these many attributes he is also a talented "ladies' man." Many a fair maiden's heart suffers auricular fibrillation at the thought of this fair gentleman with the honest smile.

We shall always be proud to remember him among our own men, and every one joins in wishing him success in his chosen profession.

STANLEY FRANCIS STOCKHAMMER
NEW YORK CITY
Theta Kappa Psi; Assistant Director of School Orchestra.

Quiet, unassuming and conscientious, with modesty and quiet dignity marking every social and professional move; with a mind scientifically trained for the truth in all his studies, Stocky dashed like a meteor into the intellectual field of our sophomore year. Ever since he has been an outstanding as a star of the first magnitude in his comradeship, his studies, and his music. Musically inclined, his ability as a pianist has done much toward making the college orchestra a success.

Stocky joined us in the second year of our struggle for a medical education, having had only one year of medicine at the University of West Virginia, and his pre-medical work at New York University. Truly, we consider his coming our gain and West Virginia's loss. It is with regret that we see him leave us, and we are confident that he will attain the greatest success in his chosen profession back in his native state of New York.

MEDICAL SCHOOL
SENIOR CLASS

ROY ROOSEVELT SUMMERS
CLENDEPIN, W. VA.
Phi Beta P; B.S. Degree; West Virginia Club; German Club; Class Basketball; Sigma Phi Epsilon; Sphinx; Phi Sigma Nu.

Ted came to us from Clendenin, a little town located on Elk River and overshadowed by the true and rugged hills of West Virginia. His ability and fine personality have won many friends, and he is gladly numbered as one of those for whom we are justly proud. A retrospective view informs us that his medical studies as well as his social activities have not been neglected. Thus he possesses a combination that go hand in hand and lead to a palace of success. In every club and organization his name is known, and a whisper seems to tell us that he has won renown; and now we wonder if he is not golf champion of our school. Ted does not have any obstacles to pass when a date with the fairer sex is wanted, unless there is a confusion of thoughts when he tries to decide which one. For damsels gay seem in unison when it comes to appreciating a man fair, with winning ways. Good luck, friend, you are bound for success, and we are waiting to hear from you in the future.

JULIAN EARLE TRAINUM
RICHMOND, VA.

Dr. Trainum is an alumnus of University of Richmond. The subject of this sketch needs no introduction to any one who has attended University of Richmond, or to any man who was in Medical School when he entered; or those who followed him. Some say that Julian comes under the classification given by one of our eminent professors during the junior year. He is never more contented or happy than when he had an audience listening to one of his "true stories" that he secured from one of his friends on Church Hill.

Trainum is classed as one of our most consistent class cutters and by the luck of the Irish have gotten by with it. Altogether, Trainum is a likable fellow, full of life and a good student, and we are sure that he will make his mark as an M.D., and if "Doug" does not look to his laurels, "Dick" is likely to steal his thunder.
SENIOR CLASS

JAMES THOMAS TUCKER
HUNTINGTON, W. VA.

Theta Chi; Phi Chi; Skull and Bones Staff, '23-'24, '24-'25; Editor of Student Directory, '25-'26, '26-'27; X-Ray Staff, '25-'26; President of German Club, '26-'27; Internes Club; University of Richmond Club; West Virginia Club.

Born to the "Clan Tucker" sometime in the late nineties, one "Jimmie", heir-apparent to the throne of natural accomplishments. For nature did her handiwork in creating him—a noble specimen of manhood, physically and mentally—there is no doubt. He is tall, lithe, dignified, commanding and silent by nature, realizing fully that a handsome man can never talk as well as he looks.

Born in Richmond, educated at Richmond College with a finishing course taken in the A. E. F.; "Jimmie" decided the study of medicine should pique his interests, and with high resolve and firm determination he came to the Medical College of Virginia, where time has shown that Jimmie has chosen wisely. The profession will gather color and stability by having him, and his classmates will possess richer and more mellowed memories from having known "Jimmie" T. Tucker.

JUDSON TOMKIES VAUGHAN
ASHLAND, VA.

Alpha Kappa Kappa; A.B., Randolph-Macon, 1923; University of Virginia, 1923-24; White Medical Society; Chi Beta Phi; Randolph-Macon Club.

Though we may know little of Ashland, Va., still for it we know one real recommendation, e. g., J. T. Vaughan.

"Skemicke", as he is familiarly and affectionately known to his friends, is that rara avis—a serious-minded, excellent student, but not a grind, modest, self-effacing, yet always sociable and friendly. He possesses a quiet humor which is constantly betrayed in the fun-loving twinkle of his eyes.

We wish we could claim him for the entire four years of medicine, but he attended the University of Virginia for his first year. Whether his subsequent success has been because of his initial year of instruction or in spite of it may be a subject open to debate.

A consistently good scholar, a thorough gentleman, a true and dependable friend, are those characteristics which enable us to predict for him an unqualified success in whatever field of endeavor he may choose.

MEDICAL SCHOOL
Felix Burwell Welton  
Mooresfield, W. Va.

Felix is so well known to us of M. C. V. that it is foolish for one to give him the usual line that goes with a “Senior Write-Up.” When a man is known so well, what need is there of an introduction? Felix is rather serious-minded and always thinks first of his work and of his duty to his fellow man and God. Nevertheless, he finds plenty of time to “bull” with his friends. From him we of the present Senior Class have come to know some of the ideals that a man of our profession should possess, for he is ever courteous, patient, cheerful, optimistic, prompt and exact with his work, and ever ready to lend the assisting hand. It is said that he will go to the foreign fields, and we know of no one who is better qualified. So Felix, our loss is merely Africa’s gain, and we wish you luck.

John Cecil White  
Chatham, Va.

Phi Chi; Theta Chi; Chi Beta Phi; B.S. Degree.

John Cecil White of Chatham, Va., came with the rest of us to M. C. V. after having taught school for two years in Buckingham county. Due either to this experience in pedagogy or to his natural appetite for learning, or both, Jack has passed through his four years in medicine, having a most creditable record behind him. He has worked faithfully and well, as his record shows. He has been friendly and kind to all with whom he has come in contact and, in short, he stands high in the estimation of all who know him.
SENIOR CLASS

Alpheus Hartley Wood
Emporia, Va.

Phi Chi; Phi Kappa Sigma; Chi Beta Phi; German Club; Interne Club.

We hesitate to make a diagnosis of this case. He is so unobtrusive. We have had Detective Burns shadow him for weeks, but little could be learned of his private life. His particular delight seems to be in sticking to his room o' nights, alone with his jug and books.

His height is six cubits and a span. On learning that ninety-five per cent of all deaths occur in bed, he decided to spurn death in this ignominious manner; hence he sits up all night and reads Medical Diagnosis. He has improved rapidly since his sophomore year when he told Dr. Haskell that the dose of magnesium sulfate was one-half grain well diluted.

We commend him to all suffering humanity.

Victor Kellam Young
Bloxom, Va.

Omega Upsilon Phi; Secretary-Treasurer Freshman Class; William and Mary Club; Interne Peninsula General Hospital.

Behold before you the likeness of Victor K. Young, M.D., who is soon to be let loose on the unsuspecting populace of the eastern shore. But those who come to Victor for medical succor will not leave his office unaided, for this young physician has proven himself a real student and a true follower of Aesculapius during his stay in college.

His time in the Medical College of Virginia has not only been a profitable one from the standpoint of learning, but he has made friends of all with whom he has been associated.

The Medical College of Virginia hates to lose you, Victor, but press forward to the success which assuredly awaits you.

MEDICAL SCHOOL
J. F. Withrow

Senior Dental Class Officers

J. F. Withrow ........................................ President
C. P. Killinger ........................................ Vice-President
Ryohei Suwa ......................................... Secretary-Treasurer
R. T. Vint ........................................ Honor Council
W. T. Wilson ........................................ Historian
G. F. Joyce ........................................ Athletic Council
Senior Dental Class History

On that memorable day, September 15th, 1923, there entered through the portals of this glorious old M. C. V. ten young, ambitious men with their wagon hitched to the same star—that golden shining light which bears the name, Doctor of Dental Surgery. Now, as we approach the end of our last year, we can look back at the past and derive great pleasure from the time-honored maxim: "The greatest happiness comes from the knowledge of work well done." The way has been long and the going rough, but we have done our best, and when graduation comes let us hope that we will march to the graduation exercise, as we have marched to so many classes, (with every member on time).

But ours was not all a tale of work. Believing in the old adage, "All work and no play makes Jack a dull boy," when time presented we played just as hard as we studied. It will be hard for many of us to forget the times we used to strut our onions down Broad Street with our old Squaw, and all the time realizing that our pocketbooks were flatter than a pulpal wall. Again we will often be reminded of the Saturday morning's sleep in Dr. Knott's lecture on "Certain Substances."

After four hard years spent in a molar college, four hard years interrupted by studying, we are fast approaching the time when we can drop anchor and row ashore on the boats of Ambition and Courage to the shores of the land of Opportunity and Chance.
SENIOR CLASS

JOHN HODGES FITZGERALD
KEYSVILLE, VA.

Xi Psi Phi; Washington and Lee Club; German Club; Vice-President Student Body, 1925-26; Dental Society.

It is hard to believe that Keysville, Va., could turn out a man the caliber of "Fitz."

In knowing him we will have life-long memories of his easy-going manner, his ever-ready smile, and unusual ability as a "bull artist."

Aside from his wit and indifference to worry, he has proven a hard and earnest worker, and it may be said of him that he never "gripes." In "Fitz" we have found a true friend for every emergency.

In his chosen profession with his pleasing personality and congenial manners we know he will prove a success.

JAMES ROBERT FLEET
STEVENSVILLE, VA.

Psi Omega; Historian Freshman Class; Athletic Representative Sophomore and Junior Classes; Basketball Team, '25-'26; Baseball Team, '24-'25; Class Basketball, '24-'25-'26-'27.

"Fleet", the youngest member of our class, came to us in the fall of '23 after a year of pre-dental work at the University of Richmond, Virginia. By hard work and a deep interest in the things at hand, he was early recognized by both faculty and students as a man of unusual ability. It is needless to say that after those years he still holds this enviable position. But Fleet is not only a student. On the contrary, he has taken more interest in college activities than any other member of our class. He has ably represented us for two years on the Athletic Council and in addition is a letter man in both basketball and baseball. And when you speak of "wimin", well, suffice it to say that he is interested.

With his going M. C. V. loses a student and a man, but the world and the dental profession gain by our loss. We wish and predict for him the greatest success.

DENTAL SCHOOL
SENIOR CLASS

Spencer Harris Hayman
Huntington, W. Va.
Psi Omega; Ohio College Dental Surgery, Cincinnati; Morris Harvey College; Square and Compass Club.

"Harry" joined us in the fall of 1926, having been exposed to three years of dental instruction at Ohio College of Dental Surgery.

He is always ready to give the ladies a treat by being present wherever they are congregated. This young man from West Virginia is showing us that he derived a great deal of knowledge from his years at Cincinnati. He stands among the leaders of his class in "theory", and his work in the "lab" and infirmary assure us of his success in future years. A thorough gentleman, a delightful companion, and an invaluable friend; he carries with him our best wishes as he goes forth to make a great name for himself in the field of dentistry.

George Frank Joyce
Stuart, Va.
Xi Psi Phi; Skull and Bones Representatives, '24, '25, '26; Assistant Manager Baseball, 1925; Manager Baseball, 1926; Vice-President Student Body, '26-'27.

Throughout his four years with us Frank has held a place in the front ranks of those who can be relied upon whenever there was something to be done through which his school or class might benefit.

His pleasing personality and gentlemanly character have won for him a host of friends, and he possesses the highest esteem and best wishes of them all.

Frank leaves a string of broken hearts due to the fact that last summer Cupid overtook him and he was led to the fatal altar of matrimony.

With the unfolding of future years which are to change the happenings of today into memories of tomorrow, for Frank we predict success which he justly deserves.

DENTAL SCHOOL
SENIOR CLASS

CARL P. KILLINGER
RURAL RETREAT, VA.

Xi Psi Phi; William and Mary Club; Southwest Virginia Club.

"C. P." is a victim of heredity; not the oral variety, however, but a specimen of the best conversative material of which Southwest Virginia can boast.

"K. K. K." entered our Junior Class in the fall of '25, having obtained his previous education at William and Mary, University of Pennsylvania, and Atlanta Southern Dental College.

Although quiet and demure, there is a tell-tale twinkle in his eyes, indicating his keen sense of humor. Loyal to his friends, faithful to his work, with all the qualities that go to make up manhood, he has always used his influence for the highest and noblest things and his memory will linger long in the hearts of his classmates.

ryohei suwa
marugame city, japan

Japanese D.D.S.; Secretary-Treasurer of Senior Class.

Dr. Suwa is serious-minded and meditative, a traveler and a versatile conversationalist, a hard working chap who can justly claim recognition and praise for his meritorious endeavors and accomplishments.

He was born in Takamatsu City, Japan, and obtained his academic education from Takamatsu High School. From here he migrated to Tokio, spent two years in Tokio Dental College (special course), and won for himself the degree of D.D.S. from the Imperial Government by passing its examination. Still his progressive nature was so eager for knowledge of the new that he cast his lot with us, entering the Junior Class in the fall of '25.

DENTAL SCHOOL
Russell T. Vint
STAUNTON, VA.
Kappa Alpha; German Club; Sophomore Class President; Junior Class Treasurer.

Vint, better known as "Squinty," came to M. C. V. after "gripping" two years at Randolph-Macon. Vint has proven a consistent hard worker, and has the reputation of being quite a "dill picker." "Squinty" took unto himself a wife during his sophomore year, and is now a "very fond father." In his work he has always stood high, and his record is one of which he is justly proud—what more needs be said?

With his ability, manner and personality, he cannot be other than successful. We wish you the best of luck, "Squinty."

Fielding Lewis Wilson
FREDERICKSBURG, VA.
Psi Omega; Honor Council, 1923-24; Historian, 1924-25.

"Fleie", being next to the youngest and smallest in our class, has labored with us for the past four years, having obtained his academic degree at Hampden-Sidney College. Though small in stature, he is intellectually well developed, as indicated by his high brow.

"Fleie" ranks among the first of his class, both in theory and in technical work. One reason that he gets along so well in his work is his lack of interest in the fair sex. But we have noticed lately that his attitude is gradually changing as indicated by an increased frequency of dates; he also looks forward to going home for week-ends. We think this is due to interest in "a certain party" at the State Teachers' College.

Judging from his good work in college, we can look into the future and see him as one of the leading men in his profession.
SENIOR CLASS

WILLIE TRENT WILSON
FREDERICKSBURG, VA.

Psi Omega; Vice-President of Junior Class; Vice-President of Freshman Class; Secretary-Treasurer Sophomore Class; V. P. I. Club.

"Trent", the boy with the winning smile, came to our midst four years ago. He has been a conscientious and hard working student during his stay at M. C. V.; he has many friends throughout the student body; his popularity must be attributed to his winning personality, for we never see Trent, no matter how busy he is, but what he has a kind greeting to offer. We know he must win the admiration of many of the fair sex by these qualities.

There is some attraction other than home life that takes Trent to Fredericksburg over the weekends. We suspect a fair lady. Trent has other qualities more deserving to mention; he ranks as one of the best in theory and practical work. He shows great interest in his chosen profession, which prompts us to foresee a great future for him in his active practice of dentistry. "Success comes only to those who strive for it." May yours be the lot of the man who built his mansion on a solid foundation.

JAMES FRED WITHEROW
GALAX, VA.

Xi Psi Phi; Theta Kappa Nu; Secretary-Treasurer Sophomore Class; President Square and Compass; Vice-President of Dental Society; Southwest Virginia Club; Hampden-Sidney Club; German Club; President of Senior Class; Vice-President of Student Body.

Witherow, better known as "Galax", hails from the mountains of Southwest Virginia. He began the study of dentistry with the Class of '26, but due to illness, was out of school for a year, and is now graduating with the Class of '27.

"Galax" has never been accused of being a real "dill picker", but still he likes to convince the "profs" that he is one of the hardest working students in the class.

"Galax" is what you would call a real "ladies' man", which might be said to be his real weakness, but he always comes in on time to do his work, saying, "After my work I put the ladies."

It can well be said that "Galax" is a consistent worker, a true friend, always cheerful regardless of his task.

"Galax," we are sorry to say good-bye to you, but we shall always expect to hear from you through your achievements.

F. P. Jones
Senior Pharmacy Class Prophecy

T WAS a hot July night. After a hard day's work filling prescriptions, I entered the theater. In a moment I found myself in the friendly darkness and sank into a seat with a sigh of relief. The curtain parted, the bright lights flashed; from either side stepped forth two immaculately dressed young men. I could hardly believe my eyes—for there stood McCalley and Collier, bowing and scraping to the audience. Collier took his place at the piano, while McCalley—the coming Caruso of the day—proceeded with his interpretation of the latest song hit of the season, "Girls Aren't Girls Any More."

I had hardly got my breath after this selection when I looked up and there appeared on the screen the following ads:

"Remarkable display of homes in Garden Heights, the fashionable new suburb. Buy a Huffman & Smith home and be happy the rest of your life."

"A reception will be given tonight at the Country Club in honor of M. P. Gunby, new Dean of Pharmacy, Medical College of Virginia. Music will be rendered by the 'Midnight Jollies,' directed by the famous Isadore Fratkin."

"Services will be conducted Sunday, October 5, at the People's Church by our second 'Billy Sunday,' Herbert F. Wallace."

The next feature that appeared on the screen was "Pathe News—Sees All, Knows All—Last Game of the World Series, Nationals vs. Americans." This was measuring up to all expectations—a beautiful home run, then slow motion of the scene and the runner. Could it be Jones? It was! How I was thrilled at my old classmate's glory! Who was the next man up but our own "Famous Catcher, Leap"!

"World's Golf Title won by C. R. Carson, the famous professional golf player."

Interior views of the new Palm Beach hotel, 'The Breakers.' Its noted Ethical Pharmacy is under the management of Mr. and Mrs. Stokes."

"Celebration of Founders Day at the Medical College of Virginia, Richmond, Va. Hundreds take part in the parade. The instructors are arrayed in their robes, with Dr. Carlisle, M.S., and Dr. Rothgeb, Ph.G., leading."

"Behind the scenes at the 'Twinkle Toe Follies'—the newest recruits passing in review before the manager, Paul Hyde. White and Preston composing and teaching the dances."

"George Dennis Voseolas, the world's famous comedian, sails for Paris."

Suddenly I opened my eyes and looked around; the orchestra was playing and the audience was leaving. I immediately realized that I had been with my Class of '27 in a dream instead of reality.
Leonidas Carlise, KΨ

Although three years have been necessary for this embryonic pharmacist to acquire the rudimentary knowledge of the intricate value of cartharsis to the human body, this persistent, painstaking, courageous youth has won the highest esteem among faculty and students.

"Pochie," as he is known to us, is a gentleman scholar and even in an uproar he consoles his anger with meagre evil as possible.

His success is unlimited in his profession for his "suits me" manner and jovial smile make him a favorite among the ladies, and popular with those who know him.

To such a man success is assured.

Claude Rhae Carson

"Kit" came to us fresh from the drill fields of V. P. I. and several minor schools. "Kit" started in as a pill-roller with the determination of some day making his family proud of him.

He has a good scholastic record, and has acquired many friends among the student body.

As a "lady's man" "Kit" is unsurpassable. You should see him strut the pretty girls at the many dances he attends.

So long, "Kit." We wish you the best of luck, and hope you have a successful career out in the Hills.
SENIOR CLASS

WILLIE N. COLLIER ..................... Richmond, Va.

   Pharmaceutical Association; Virginia Pharmaceutical Scholarship; Member of Seminar Committee

   Wild Bill hails from the swamps of southern Virginia. Bill was vice-president of the Mustache Club 1925, and President 1927, also the supreme ruler of the question club since he landed with us. Bill breezes into class with the air of a successful pill-roller, that is the kind that will uphold Dean Rudd's high ideal "That a Druggist is more than a Merchant." Bill has a pleasing personality, and a spotless character. He is a hard worker. The art of pill-rolling has kept Bill's shoulder to the wheel continuously to attain the goal.
   We all wish you the best of luck.

VIRGINIA CHRISTINE ELLIS ................. Ronceverte, W. Va.

   Pharmaceutical Association; Senior Class Historian; West Virginia Club; Theta Gamma Upsilon.

   We have been lucky in having such a class-mate as Virginia. She has stood by us through our "ups and downs" and proven herself to be a fine friend, a good sport, and a congenial companion. Her quietness, pleasant personality and accommodating good nature have won for her a place in the hearts of her associates.
   We hesitate to say good-bye to a pal like Virginia, but we know that a big success and fortune is waiting for her in West Virginia, and the best wishes of each member of the class goes with her in her chosen profession.

SCHOOL OF PHARMACY
SENIOR CLASS

MARTIN POWELL GUNBY, K Y . . . . . . . . . . . . . . . . Berlin, Md.
Pharmaceutical Association.

Powell hails from the eastern shore and he has made a good representative for that industrial part of the state, for sobriety and industry are characteristics of this embryonic pharmacist.
He has made a good student and is an asset to his chosen profession in every respect. His sterling qualities have been exhibited time and again.
We hear a rumor that some one on the eastern shore is mighty interested in his career and maybe we will hear from this officially soon.
It is with regret that we say good-bye, but our good wishes go with him.

OLAND KENT GUYNN . . . . . . . . . . . . . . . . Woodlawn, Va.
Pharmaceutical Association; Southeast Virginia Club.

Oland, better known among his classmates as O. K., came to M. C. V. to enter the profession of pharmacy with the class of '25.
O. K. hails from the southwestern part of Virginia. His ability as a student has been exhibited on numerous occasions and he is liked by all of his friends for his continued grin and easy-going manner.
His future in the field of pharmacy is bright and we wish him all success in the world.
SENIOR CLASS

RUFUS MARVIN HUFFMAN . . . . . . . . . . . . . . . Mt. Crawford, Va.

Pharmaceutical Association.

Rufus hails from the good old section of the state known as the Shenandoah Valley. He is an earnest and hard-working student. Joining us in the fall of '25 he has made a success in all of his work and his success in his chosen profession is assured. He is held in high esteem by all of his classmates because he is a loyal friend and hard worker. Good luck, Rufus, may all of your troubles be small ones.

PAUL WILLIAM HYDE, Φ Δ Χ . . . . . . . . . . . . . . Buchanan, Va.

Pharmaceutical Association.

Paul has fought the good fight manfully and is now leaving our midst as a forward-looking pharmacist. His favorite song is "Baby Face," and when he is around you can usually hear his melodious voice warbling this refrain. His success will be unlimited, we are sure, for his pleasing personality will carry him to the heights of success. Good luck, ole boy, and may success be yours in your chosen profession.

SCHOOL OF PHARMACY
Frank Poe Jones, K Ψ ............................ Danville, Va.

President, Senior Class; Baseball Team, ’25, ’26; Chairman, Student Seminar; Pharmaceutical Association; Membership Committee, Y. M. C. A.

A well-rounded man in every respect. The terrors of pharmacy have caused him no concern. Diligent and thorough in his work, yet always finding time for relaxation.

As president of the senior class he has given us all an opportunity to know and admire his excellent qualities.

Frank seems to have a controlling interest in the “West End,” and when the last class is over he heads west. We hope and feel sure that he will be as successful in the pharmaceutical line as he has been with his private line.

Gayle Lloyd Leap, Φ Δ Χ ............................. Waynesboro, Va.

Gayle comes down from one of the Shenandoah Park cities.
He is a light-hearted and happy-go-lucky fellow. Nothing ever worries Gayle.

He asquired great fame as a baseball catcher at Fishburne Military School, which he has often displayed at the games he has played for M. C. V.

Our greatest hope is that he is as successful in Pharmacy as he has been in baseball.

Our best wishes for luck, Gayle.
SENIOR CLASS

Archie Owens McCalley, Φ AX ............ Richmond, Va.

Pharmaceutical Association; Secretary and Treasurer, Senior Pharmacy Class.

"Mac" is another Richmond boy that has made good. He has a personality which is a natural gift to only a few of the chosen.

Mac had a hard time breaking into pharmacy, but when he broke in there was no end to his ability. He furnishes the majority of wit for the class and is one of the few that usually says what he thinks, regardless of the circumstances.

Mac is just a good all-around fellow and it is with deepest regrets that he leaves our midst. Good luck, old boy, and may the rain of fortune shower down on you good and hard.

"Roth," as he is known through the student body, hails from the beautiful caverns of Virginia, and the wilds of Blue Ridge.

He is a hard worker, and has high ideals about his chosen profession. We are sure he will settle down to be an ethical druggist.

The first year he was here he made many trips to Ginter Park, but they have been less frequent this year. At the present time we aren't prepared to say why this radical change.

We wish him the same success he had at old M. C. V.

Pharmaceutical Association; Honor Council, '24-'27.

Smitty came to us with a determination to establish a name for himself in the commercial world as well as procure the coveted Ph.G. He has accomplished both and as he is about to leave us the turpentine products are becoming known over the entire state.

A pleasing personality and continued smile are characteristic of "Smitty" and as a result he has won the friendship of the entire class. A man with such ability is assured success in his calling and the best we can do is to wish him our luck and hope that he will always remember M. C. V.

Pharmaceutical Association.

William came to us from the great southwest, as a country lad, but he soon acquired the air of a city-born. By his frequent trips on the Boulevard he soon became known as "Boulevard." This also helped to distinguish him from the other "Smith Brothers."

Smith has a pleasing personality, and is a cheerful giver.

We all are sure that "Boulevard" will make a great success.
To Dr. H. L. Osterud

Who, by his unfailing devotion, unselfishness and sacrifice, has been our inspiration throughout the years of our struggles with anatomy, we, the Class of 1927, dedicate this section of the X-Ray.

History of Class

As we near the parting of the way we recall with pride and regret the few but memorable years spent under the guardianship of our Alma Mater. September, 1924, marked the beginning of a most noted history in the life of our School of Nursing. Although few in number, there was no lack of quality. We donned our ill-fitting uniforms and reported on duty. Almost immediately we formed a lasting friendship with Mr. Bon Ami, and his cousins, Miss Brush and Madam Dutch Cleanser. As days passed we learned to behold, adore and revere our "Senior" and carry out to the minutest detail their slightest wishes. After a little practice in taking temperature, pulse and respiration, we rose in our own opinions. Receiving our "Caps and Bibs" was the crowning triumph of the first year. With a constant changing of membership we entered our junior year sadder but wiser. With hopes shattered and spirits beaten and bruised, we plunged onward toward the goal. The last year has brought a bigger realization of our meager knowledge and of the many avenues of wisdom as yet unventured. We have emerged with heavy losses and are proud of those who have held on until the end. Old Alma Mater, we love you and will strive to ever be true and to help you achieve the uttermost. As we now come to the end of this perfect day and embark each on our separate ship, may we aspire to the highest and best good in life and conquer worlds unknown. In the days that are to come may our spirits ever be united in love and sympathy. May we fine real happiness and true success in the service of mankind.

Class Historian.
SENIOR CLASS

MARGARET ANNA BECK
Coeburn, Va.

"Becky Ann"
President of Class of 1926; Secretary Y. W. C. A., 1925-1926.

"Energy and perseverance will accomplish all things."

"Becky Ann" sure came to M. C. V. with the intention of sticking it out. She cannot be discouraged and is always giving a cheerful word to someone else. Though serious when necessary, she is happy all the time, and her characteristic giggle has been known to break up many cases of blues. "Becky Ann" is very studious. She never feels that she knows it all. Her motto seems to be "Learning by study must be won; 'twas never entailed from sire to son."

Good luck to you, Beck, and a long and happy career.

ELIZABETH GILLIS
High Point, N. C.

"Gillis"
President of Class, '25-'26; Reporter to Skull and Bones, '26-'27; Class Secretary and Treasurer, '26-'27.

"What is a woman, if she is not a mystery?"

Another Tarheel for Memorial to be proud of! Gillis is the most dignified member of her class, but there are times when she lays aside her dignity and lets all know how really nice she is. She has proven herself to be worthy of her motto. In the sickroom amongst the suffering, in the classroom amongst the studious, in the ballroom amongst the gay; she seems to fit in every environment. All in all she is a hundred per cent girl. With all her natural attributes and those acquired while in training, success in her chosen profession is assured. Gillis will eventually return where all Tarheels go and carry with her the love and respect of all who knew her in old Virginia.

NURSES
Laura Belle Harris
OLD TRAP, N. C.
"Rickets"
Class Historian, 1926-1927.
"Kind hearts are more than coronets."

Laura Belle comes to us from North Carolina, bringing with her a kind heart and the true spirit of a nurse. She is noted for her sunny disposition, her self-sacrificing spirit, and her everlasting smile. She was never known to speak unkindly to a patient or of anyone. Never shirking a duty, nor slighting a task, she took pride in doing satisfactory work. Her fellow nurses gave her a good name, and her patients all liked her. Laura's future is yet undetermined, but there are mighty whisperings about that ring on the fourth finger of her left hand.

Florence Howard Spiers
RICHMOND, VA.
"Folly"

"To thine own self be true, and it must follow as the night the day, thou canst not then be false to any man."

Fate was kind to us in January, 1925, when "Folly" came to join us. She has many noble characteristics. She is a true sport, a staunch friend and a loyal classmate. "Folly" is noted especially for her marvelous disposition and even temperament. Trouble and adversity seem scarcely to disturb her quiet countenance, although apparently a dreamer. When work is ended, "Folly" joins heartily in pleasure. She knows how to be a real pal. Florence, you carry with you our wishes for happiness and success in your chosen work.
SENIOR CLASS

GRACE CAROLINE SATTERWHITE
FREDERICKSBURG, VA.

"Satterwhite"

"How far that little candle throws its beam."

Grace came to join our class on September 1, 1926, from Blue Ridge Sanatorium, where she, having finished a two-year course, decided to increase her knowledge by entering our school of nursing for a year. She always wears a smile, and has a kind word for everyone. Only one look at her face and you read success. She has won a place in our hearts; although our paths must shortly sever, pleasant memories will linger.

VIVIAN WILKINS
CLINCHFIELD, VA.

"Veve"

"Mistress of herself though the stars may fall."

In choosing her profession, "Veve" has succeeded in making herself happy, and is rendering valuable aid to those who are in need of cheer, comfort and consolation. Her cheerfulness, vivacity and industry reflects all her activities and makes people who come in contact with her feel happy to be in her presence. It is needless to say that Veve's pleasing personality, coupled with her physical charms, has been an asset to her in many dealings with the opposite sex. Veve certainly hit upon a fortunate idea when she decided to take up nursing, and we know she is bound to succeed in the future.

Junior Medical Class History

It has been just three short years, as measured by the falling sands in the hourglass of time, but to us, as measured by our long hours of hard work, almost an eternity, since we entered as embryo doctors on September 17, in M. C. V.

The first year passed slowly, as we thought, but with our complete knowledge of Osteology and Anatomy, with all its "Working Mechanisms" and "Pop Quizzes." We were soon swept on into the rushing stream to learn of the developing morula mass, and the finer structures of human Anatomy-Histology, but at the same time we still had room in our crowded brainboxes to remember what reagents were on shelf 7 in Physiological Chemistry.

Time passed on and we, as all-wise, sophisticated sophomores, directed our energy plus the surplus we could command to the mastery of Physiology and Pharmacology under Dr. Haskell. In Neurology we learned of the C. N. S. with all its complicated arrangements from Dr. Osterud (and Ranson?). In Bacteriology, after we had learned the English language as it really is, we cultivated, attenuated, and agglutinated the different micro-organisms. Dr. Phillips and his staff propounded and expounded the principles of Pathology to us. From Dr. Blanotn we learned, with all our extensive practice, that "Speed" was one of the essentials in Physical Diagnosis.

Too soon the morn had changed to noon, too soon today had become yesterday, and we were juniors. Our family was greatly enlarged in its third year of medical life by the transfers we received. Dr. Bascom joined with our class in the pursuit of medical knowledge. Many of our family had shown themselves to be men, for one who can raise a mustache is more than a youth, and one who cannot is less than a man.

Believing we had not learned all there was to be learned, Dr. Haskell still proved himself to be a quiz-master "par excellence," having no regard for the speed limit of the heart and those possessed of a total suppression of cerebral activities when we were the objects of his interrogations. Dr. Michaux told us all about women; Dr. Whitfield about self-protection being the first law; Dr. Vanderhoof about his student days with Sir William Osler; Dr. Baughman about a woman being as old as her coccyx; Dr. Knott about the spread of diseases; Dr. Grinnan about codliver oil, orange juice, and sunshine; Dr. Lassersohn all about the heart; Dr. LaRoque about water externally, internally, eternally, and rest.

Thus endeth the third lesson. May success crown us, and the golden horn of plenty surround us. We have sailed over the stormy seas for three years, and the port is but a short distance ahead. The past will be looked back upon with pleasure, forgetting its hardships in the light of a better day, with the satisfaction of success attained through honest toil, and greet the future men and women, mindful always of the obligations of a great profession as medicine imposed upon us the welfare of suffering humanity.

Junior Dental Class History

The history of the Junior Dental Class has been unique in many respects. It was the smallest class matriculated in the School of Dentistry for several years, and its members have received unusual personal instruction.

Only five of our original class remain, but our ranks have been enlarged by transfers and others. The freshman and sophomore years reduced the number in our class considerably, but we hope that the stages of elimination have passed and the members of the present Junior Class will stick together to the end.

At present we are realizing that our hands are very large and exceedingly hard to manipulate, but in the course of time we hope to be able to work through a mirror with perfect safety to the patient. We have days of sore trials and tribulations, and how often we wish for four hands instead of two, and for thumbs that were not always in the way. We have chosen the instruments which are to be "the joy of our lives," but to our utter consternation we still encounter a few patients who are not convinced by our professional manner, which we have cultivated with the greatest care.

We realize that, had our past been easy, we could not have accomplished the things which were absolutely essential for us to know. We have worked conscientiously and faithfully, with strict adherence to the motto, "They succeed best, and alone have permanent success, who, with loyalty and perseverance, follow ideals and divine ends." It is a pleasure to enjoy the happiness which comes from the knowledge of work well done. May our class ever maintain the high ideals which it has established, and may its members prove an honor to their Alma Mater and to the profession.

Junior Pharmacy Class History

In the fall of 1925 a motley group of "Amebae" presented themselves at the portals of M. C. V., and for various reasons matriculated in Pharmacy. Some came because of inescapable parental orders, some willing to take a sportsman's shot at professional pharmacy, some fired with the noble ambition to "show 'em how it's done," and a few for the purpose of finding out how little they knew and of correcting the defect. Needless to say, in the ensuing months of toil and tribulation there was a time when each seriously undertook to explain his presence to his own satisfaction, if not to that of the faculty.

After a hectic fight for adjustment, the "embryo pharmacists" reached the end of the first semester, convinced that "the best substitute for genius is hard work," and that their only salvation lay in devoting at least ten hours a day to chemistry, and a like amount to every other subject. It may be recorded that one of Mr. Rudd's papers, namely, his famous chemistry document containing one hundred and eighty balanced equations and their why's and wherefore's, received more than ten hours' consideration.

All of that is ancient history now, but the Juniors still thrill to the old battle cries: "We will now have a ten-minute quiz to see what you know about the last lecture." "Just think of the ramifications of this!" "Boy, where did you get YOUR information?" "Close your eyes and see it with your mind's eye." They have discovered that Botany is something you think you know and yet you don't; that Organic Chemistry is a character builder, and that "therapy" is the most important word in Mr. Miller's vocabulary.

With all this knowledge and experience it is only fair to assume that they will have a successful college career, but time will tell, and with their senior year approaching, as the saying goes, "It won't be long now."

History of Class of '28

The advent of the Junior Class in September, 1925, at the Medical College of Virginia, marks a date that will not be forgotten by us, for we're still attempting to recover from the nerve-wrecking ordeal of meeting and overcoming the many obstacles that confronted us during our preliminary and freshman year (Anatomy, Hygiene, Demonstration, and practical work of a Freshman).

Then in our second year with Anatomy and Practical Nursing behind us, we assured ourselves that ours was to be a light year, but alas! —Chemistry, Pediatrics, Obstetrics and Surgical Technique rose before us like an insurmountable wall, and the eternal grind began anew.

But ours was not all a tale of work. Believing in the adage, "All work and no play makes Jack a dull boy," when time and opportunity presented, we played just as hard as we studied.

As the year draws to a close and we are completing three-fourths of our course, we pause to express our appreciation to the members of the faculty who, by their kindly words of advice, have spurred us on to greater efforts in accomplishing our purpose.

History of Sophomore Medical Class

NOW that the time has come when the formula M.D. equals US, we feel as though we are really getting somewhere. It does not require much reminiscing to recall the days when, after endorsing the check dad gave us and turning it over to Mr. "Mac," we were told to go upstairs, and there had a big box shoved at us. Someone said, "Check that," and after looking all over the third floor for the check room, a wise upper classman told us that what was meant was to see if all was in the box that was supposed to be therein contained. Upon opening the box, we saw a typed sheet with the strangest names thereon, and such a sight were the contents of that box! After struggling for about an hour, we gave up and said everything was there, whether it was or not, as then we didn't know the Innominate bone from the Sphinoid; but we do now (?)

You've often read the words, "What a whiff of a difference a few 'scents makes!" but you can't really appreciate the full meaning which under those words until you've had Anatomy or sat next to a Freshman Medical student in class. We had a few more courses after Christmas that year, but we have forgotten what they were, as most of us passed them all right, and besides they came right during baseball season.

Now this year started and when we thought our freshman year had been a hard one we were wrong. The much loved, though greatly feared Dr. Chas. C. Haskell, Esq., etc. (we have him again next year), was not and thus far conquered—at least we made 80 per cent or more on his courses. Dr. Haskell was always teaching us new things, though; so different from what we learned on the third floor of the new building. For example, in the Anatomy Lab. we smoked Camels, Lucky, Chesterfields, as our tasks dictated, but Dr. Haskell taught us to smoke drums.

Along with Dr. Haskell, whom we had the entire year, came Dr. E. C. L. Miller and his Bacteriology. We would have enjoyed his course a whole lot if we hadn't known so many of the upper classmen, from whom we learned in advance that he had lived in India for a while, and that in the good ole Bago pus flowed like water; so there wasn't much more to learn. Dr. Shaw, who couldn't express himself in words, when it came to the climax, wrote us a note on Y. M. C. A. stationery, and asked us to please smoke cigarettes in the laboratory because the smoke helps to disinfect the room.

The second term this year Dr. Chas. Phillips, in his course in Pathology, introduced us to some of the "real problems" of his friend Dr. A. B. C. These "entities" and autopsies worried us no little, but we will say no more, for he has told us that he has something "Special" for us next year.

Along with our other course came a major subject known as Physical Diagnosis, which met only once a week. This much I learned from this course—not from any lecture, because they were always too fast for me—but I followed as directed and looked it up in the book—which Dr. Blanton wrote particularly for our class; the reason he talks so fast is on account of the name his parents gave him—he talks as fast as the Wyndham if he don't. However, we enjoyed the course a whole lot, because once a week we could parade Broad Street with stethoscope partly within and mostly without our pockets, so that the populace could see and think we were real doctors.

But now the year has passed, and for most of us successfully, and though was had by all, we wish to express our sincere appreciation to all the men on the faculty, who have so patiently and earnestly worked on us and with us, that we might be the better enabled to practice that greatest of all professions, and thereby serve our respective communities to better advantage.

To the men of this year's Senior Class we wish God-speed on their journey, as they now are starting a new life in their chosen field. It has been a pleasure to have known you, and to have been in college with you, and may success await you, as we are sure it does. You have only one thing, as we see it, in after life to look back on with regret, and that is that you were a member of the Class of '27 instead of '29.

Historian, Class of '29.

Sophomore Dental Class History

HISTORY is defined as the accurate narration of events, their causes and results. The first and most important event in this history was the gathering of thirty-six enthusiastic and ambitious young men within the dignified halls of the Medical College of Virginia on the morning of September 16, 1925, for the avowed purpose of becoming dentists. The reasons for that assemblage were many. The results were expected by the faculty, but they were surprising to us.

At the second assemblage of the class on the fifteenth of September, 1926, only twenty-seven of the original number were present, and now there are only twenty-six. The semester grades have gone in, and soon there will be only—but I am supposed to be a historian and not a prophet. This decline in numbers was not our fault; we burned the traditional midnight oil sufficiently, but the faculty expected us to become authorities in every subject. Knowing that the day of miracles had passed, the most intelligent members became disgusted at such expectations on the part of the faculty and resigned. We who were left, believing ourselves capable of accomplishing almost anything after overcoming the difficulties of that first year, have continued with everlasting hope in our hearts and rabbit feet in our pockets. Even now we entertain high hopes of becoming dentists in the course of time; that is, some of us. We believe we could successfully present ourselves to the world as janitors specializing in the removal of remaining match stems, tire experts with special attention to vulcanizing, bottle washers, jewelers, plasterers, and butchers. We might even go in for bicycle riding.

We had heard of the great work of Dr. Haskell from those who had gone before, but we had no idea he was such a star until we saw him play in "His Hour" every Friday morning. Sometimes Ed. Adams and others co-starred with him. At the present writing we are all busy preparing papers on some phase of dental metallurgy, which will appear in the June issue of the Journal of the A. D. A. The advance orders for that issue have already exceeded the million mark. This year we became greatly interested in the "Y" and its activities. Everyone joined, as every sophomore does. We also developed the habit of hanging out around the corner of Adams and Franklin every Sunday morning.

This year we were the sorrowful witnesses of the passing to the unknown beyond of the beloved Dr. Brodnax, and knowing that it could not have been deferred, we take great pride in the fact that we were the last dental class taught by him. We sympathize with the unfortunate freshmen. We were also the first class taught by Dr. Gray.

Although we complain occasionally, become disheartened and discouraged at times, and wonder why we do not have classes on Sundays and holidays, we nevertheless realize that we are being given a wonderful opportunity and success or failure depends on us. Only a few years will pass before we will be wishing that we were sophomores again at M. C. V.

Freshman Medical Class History

As there are always days that are coming into our lives that stand out among others, so will the two or three days of the middle of September, 1926, stand out. It was during these days that eighty some odd young men and four young women, doctors-to-be, hailing from thirteen states and one foreign country, sought admission as Freshmen medical students into the old M. C. V.

Since having been carefully scrutinized as to character and credentials, and selected from a list of applicants many times the size of our class, we naturally felt a selected crowd—and we were, for about forty per cent of the class were degree men, and the others were well prepared. Some had been dentists, some pharmacists, some preachers, some teachers, and some just married men. And, of course, it wasn't long before it was hinted, and finally affirmed, that we were the best Freshman class ever.

And after matriculation, Anatomy. Yes, we were given some bones—a box full—and made aware that we had only a few days to find out whose bones they were, and other such things—the data on this costing $11.00 and $18.00, according to Gray and Spaltholtz. We never found the data, however; it just came to us.

The morning on which we were to begin dissection we arrived at the Anatomy hall, each one armed with a scalpel and probe, and shielded with the smoke of a Camel, bent upon tearing to pieces some unfortunate. Yet, as we entered the hall and were met by the odor of pickled human beings, and as we looked upon the gruesome sight before us, we felt a sense of uneasiness and even a sense of fright. It was with reluctance that we made the first incision. But Ollie, Liz, and Old Uncle Joe, together with many other consumptives and syphilics, were soon probed to pieces, and we now feel that we should be called real anatomists. As for Anatomy, we have but one sad reflection—we missed so much after the first few weeks of our course the phrase, "Get ready, gentlemen, I am coming around to quiz you," and the cheerful face of one who was dear to the whole school. Dr. Brodnax was a bosom friend of every freshman in our class, and it was with much despair that we learned of his sudden death. We shall always remember him as a real friend and a distinguished and beloved teacher.

Some one asked us not to forget to mention Materia Medica. I think that the class would like to have it mentioned, as it wants posterity to be cognizant to the fact that so many hundreds of drugs—for local action, remote action, irritants and stimulants—are not so easily learned, especially when doses have to be learned, too. However, the class liked Materia Medica fine.

It is seriously doubted that we should have ever been able to overcome all the obstacles with which we have met during our year's work had it not been for the inspiration which has been furnished the class by its quartet of co-eds. To them, the daughters of Aesculapius, the honor, the power and the glory.

Having made such an excellent start and a good record for the first year, we shouldn't wonder that the future historians of the Class of 1930 will have material for writing glorious histories, and that the world will expect more of this class than of any other class which has been graduated from old M. C. V.

Freshman Dental Class History

LASS Histories, like children, should be seen and not heard, for they are almost the hardest of all things to make interesting, especially for one so unfitted for the job as I.

Chronologically speaking, we gathered together at about the usual time last fall, an average Freshman Class, and did the usual things; except, of course, we had to work much harder than the rest until Christmas. I refuse to be held responsible for the history of Christmas. It might make something interesting to read, and that would never do for a class history. We returned at about the usual time and have been doing the usual thing ever since, and so we come to the writing of the history, which I am doing in the usual way, although a bit careless perhaps as to dates and details. The dates were all used up anyhow by such class sheiks as our worthy president and our tallest member, "God's Gift to Girls."

In looking back, the picture which hangs most clearly on the walls of my memory is one hard work upon a background of still harder work, only interrupted at frequent intervals by large areas of a substance known to the local scientific world as "Hot Air." That several members of the faculty, and pme om ½artoci;ar. os a be;öever om tjat gppd p;öd asop., "The Bull is Mightier Than the Bullet" is very evident. Many things will remind us of this year; microscopes, test tubes, stiffs, celluloid teeth, temporo mandibular articulations all will bring back some kind of memory. We will be refreshed to recall some things—as the sight of a big, jolly, good-natured Irishman coming into class about ten minutes late, always on the receiving end of a joke and enjoying it as much as anybody. We will remember with a smile our enterprising student who, by a simple trip to the City Hall, solved forever the room and board question. And who will not think with joy over the Wednesdays and Saturdays, happy meeting days of our Sewing and Gossip Circle?

And now the year has ended in much the usual way, and I trust that we are about to become average sophomores, whether in the usual way or by the grace of the Lord and the faculty I cannot say. We have enjoyed it all, as freshmen do, contrary to their sworn statements, and after a summer I trust we will all return to another year of work and pleasant associations. Like all histories, this epoch will now end by wishing the members of the class all the success and happiness possible, which will of course be theirs . . . . in the usual way.

History of the Freshman Pharmacy Class

On the fourteenth day of September, nineteen hundred twenty-six, a very wise looking group of young men and fair co-eds applied at the portals of M. C. V. for admission into the Freshman Pharmacy Class, and in due time were enrolled.

Some few days passed before the class could find its way to the various class rooms; however, room 208 became a memorial one. In this room Mr. Rudd introduced “Newell’s Chemistry,” and Dr. Warren developed a wonderful vocabulary in Biology. One bright student drew on his imagination and wrote “Pharmaldihid” when directed to write Formaldehyde.

The “Math Quizzes” thoroughly convinced the class that the “fundamentals of Math” had been forgotten, and that it would be to their interest to study the little green book.

Though many times discouraged, the class developed a spirit of earnestness in all their work, and the thought of final victory was the star which guided them along the pathway of knowledge required of all.

History of Class of '29

We, the Class of '29, entered upon our eventful career September, 1926. It was with fearful step and trembling hand that we little "Freshies" began our first day's work. We have made many blundering mistakes which only make us better understand ourselves. But we are learning fast. We who are here are marching on to the stepping stones of success. Each day we are happy and glad to take up the tasks that are ours, and hope to make the world better for us having lived in it, by our kindly deeds and helping hand.

We have learned well the fine art of "Scrubbins" in this our first year.

But never do we regret the outstanding moment of entering upon this most interesting and difficult career.

The Revellers is the "enfant terrible" of the Medical College of Virginia, being born in September, 1926. Due to the desire for unity between the organizations that sponsor the musical and dramatical sides of our college life, the Revellers was formed by a body of students interested in these phases of college activities. All three branches of the organization have been well received, both in school and in the public performances, having taken active part in all student body meetings, in Richmond movie houses and over radio, as well as their own annual performances. Of course there have been, and are, many obstacles in the path of success, but we are happy to be able to say that most of them have been conquered, and now victory, accompanied by success, is gleaming brightly on the horizon.

The Student Research Council of the Medical College of Virginia is an organization sponsoring the production of scientific research, along all lines of endeavor in the scientific world, such as Chemistry, Bacteriology, Anatomy, Physics, Physiology, Pharmacology, in fact, in all forms of science. The need for such an organization can easily be seen and the excellent work which the Council has done is ample proof of the interest and inspiration developed by the members of the body. The papers prepared by the men fostering the Council are published in all of the American Scientific Journals, in the Bulletin of the Medical College and are constructively discussed at each meeting. The base of the organization is original research along the foregoing lines, with proper respect paid to the amount of work done and the method of doing it. It is indeed an organization worthy of the interest of the College and the world of Science at large.

</table>
Fraternities As Some See Them

Theta Kappa Psi

(Emphasis on Last Word)

Even the pharmacists could not stand this crowd, so they insisted that the medical outfit add “Theta” to its name as a matter of distinction. As you have doubtlessly guessed, this bunch belongs to the Grand Old “Click.” So loyal are they that they even vote for themselves and each other. Their only claim to merit is that they are the self-appointed intelligentzia of the Medical College. They consider themselves the medical department of Phi Beta Kappa. Nobody else wants the greasy grinds, consequently they get them.

Phi Delta Chi

Here we have another promising herd of future salesmen for Lydia Pinkham’s Panacea and the Smith Brothers’ well-known product. Just as Theta Kappa Psi and Chi Zeta Chi pick up the leftovers in the medical school, so would Phi Delta Chi in the “Farm”-acy department, if it were not for the fact that Kappa Psi fights with them so vigorously to determine the ownership of the boys with the biggest pants legs. All joking aside, though, this club has as a former member a medical student who makes up for a large percentage of the misfits who stroll around the corridors sporting Phi Delta Chi pins.

Phi Chi

There may have been some reasons for the existence of the Black Hand and I. W. W., but after a lengthy consideration we can ascertain no reason for the organization of such a crew as this. They are fair in agreeing with us, however, since they charge each member one dollar for absenting himself from a meeting. To judge from the attendance at said meetings the majority of them think it fully worth that sum, and it is rumored that some are willing to pay ten.

To give a brief history of this aggregation requires a mind of cunning evil; however, it shall be mildly done. We are told that its founder was a descendant of Solomon, who also believed in numbers, but who had less judgment. It is said that among Solomon’s wives there was one of quality, whereas among all this crew we fail to find one answering that description. This crew tried to get professional four years ago by renting rooms in a building carrying that name. Being unable to make friends with the policeman on that beat, they decided on the 1600 block on West Grace. While at this location they seemed very prosperous, being visited at frequent intervals by a large black automobile. Some say that interested neighbors had a share
in causing this jollification, but we are not sure of that. About this time all of the fraternities received cards from the uplifting societies saying, "God save our girls from the fraternities," Phi Chi got a ten-page letter.

The next year the boys moved down on the 300 block on East Grace. This location was obtained to afford proximity to the Marinello Beauty Salon, we are told. This building was of a very substantial nature, and it held together for a whole year.

At last, after many years of toil and search, they have located now in a neighborhood of their equals in society—down on South Third Street. The boys are all happy now. We hope that they stay happy and where they are. However, if they continue to expand, we would suggest a school and a reservation of their own in Fulton.

Phi Rho Sigma

This crowd went into debt year before last when they floated their candidates into office on a sea of liquor. As a result of the indebtedness that was incurred in that political campaign, they were unable to pay the rent at their old place on West Grace Street, and they were thrown out by the enraged landlord. Looking around for a location where they were not so well known, they landed on the upper story of a joint close by the school, where they could drop in between classes for a quiet game of craps or poker. Now, you can drop in at any time at all, and if you are not crowned by a bottle on the way up you will run into a warm game.

Omega Upsilon Phi

Why in the name of Herpicide and promiscuous intravenous medication is it that this mob, with as distinguished and truly honorable men as they number in the faculty and the alumni, will take in such faded pieces of material as they have in recent years is too much of a real problem for us to fathom. As a rule they seem to incline toward the pill-rollers, since anyone with a Ph.G. is welcomed with open arms. This aggregation lines up with Phi Chi in the political world, but it is rumored by competent observers that the latter club accepts this state of affairs as a necessity and does not extend the friendly political relations to the social world.

Phi Beta Pi

Words fail us. In looking over the roster of this assemblage of would-be fraternity men we see a grand total of one or two men who might be called fraternity material in a college of liberal arts and sciences. These birds have two virtues or justifications for living, in the eyes of the rest of the clubs of the school. First, they vote in a body with the rest of the "Dirty Dozen" fraternities to elect Phi Rho Sigma candidates to office; and second, they have a hall where the rest of the fraternity members of the school can take their dates on Saturday nights and dance without having to pay for it.
Chi Zeta Chi

The worst things that have been said about all the rest apply to this motley array. These insults to the institution of the Greek letter society are so bad that when it is their turn to have a member elected to some office they have to give the place to some other fraternity, because they know that no political machine, no matter how well oiled, will be able to elect anyone from this crowd to office. The procedure for getting into this "fraternity" is to be so hopeless that even the rest of the fraternities won't bid you. You then automatically become Chi Zeta material, and as soon as they find out that you haven't been bid by anything else they will take you in.

Phi Lambda Kappa

We are supposed to discuss only fraternities, but to make a good job we will throw a little ink for the benefit of this Yiddish Sabbath School class. This is indeed an enviable organization, numbering among their last year's members a bird who left school to keep from being shot. The requirements for membership in this are any of the following: Muchly hooked beak; derby crushed down over ears; oversized head that has swelled that way without apparent reason.

Kappa Psi

Founded by a crowd of goofy grinds who never would have made anything else, this crew used to take in anybody who was dumb enough to concentrate their entire efforts on making marks of 100 and to let their reasoning powers atrophy in the process. Oh, well! This gives the pill-rollers a chance to get a pin to hang on their girl, and as long as she doesn't know the difference between Kappa Psi and a fraternity no one has any kick coming.

Psi Omega

The first word in the name of this fraternity is suggestive of the cognomen by which most of the members should be known, if one may judge from the rural appearance and accent that characterize these individuals. After all, even a dentist's life is preferable to what most of this flock would have had otherwise, as you can't blame them for studying dentistry. The only puzzling thing is, how can anyone of them have voted for anybody else in the fraternity? That is what is beyond most of us.
We had almost said that these molar mutilators were worse than the Psi Omegas, but we won’t say that. In the first place, it couldn’t possibly be true, and in the second place, if anybody said that about any fraternity, his life wouldn’t be worth a nickel. On the other hand, these bicuspid hounds are certainly no better than the Psi Omegas. In fact, they rate considerably less—no that is impossible. The only thing to do is to compromise. Both are equally bad (if that be possible).

This is our baby fraternity, infantile in the sense that it is the first time that they have been represented on our campus for an elapse of some years. Strange doth it seem that this ruthless bunch represents that grand ol’ organization known to so many of the old grads of the school. No remarks that we could make would be capable of giving more credit to the national organization than it has already, but we feel free to express ourselves about those who compose the active local chapter.

The portraits of this bunch are to be found within these pages, and to an interested party it is worthwhile to study each and every one of these characters. It is a study in pathological human nature, an example of rare specimens. Being so rare, it is a phenomenon that they are all caught in one group.

They have a place for gathering together, known to all the sports in the college, and to the old medical student there need be no further explanation. It’s an unusual occurrence when there is not heard, sometime between the hours of twilight and dawn, the patter of feet which we would say are small, judging from the rhythm and echo. These dainty footsteps are heard stealing quietly into the comfort of the A. K. K. quarters to enjoy a few hours of repose and seclusion (?). Again we leave the imagination to wander.

They have a patron, the lucky crowd, who owns a cottage in the country nearby. This they use to great advantage. We can’t say what goes on near the banks of the James, but we can judge much from the way they start off and the condition in which they return.
Doctor W. H. Parker, who for more than thirty years devoted himself whole-heartedly and devotedly to the promotion of athletics in Richmond and at his Alma Mater, the Medical College of Virginia, thereby entwining himself about the heart of every student and alumnus;

and

Horace R. Hicks, our student coach, whose appearance at M. C. V. three years ago placed our athletic situation upon a stable basis, and is developing an athletic system in keeping with the new growth of the Medical College of Virginia.

</table>
Coach Horace Hicks called the candidates for the 1927 basketball team to their first practice the last of November. With three letter men, the last year’s reserves, and some freshmen from the class basketball teams, the nation’s winter sport soon became king of athletics.

After two weeks training it seemed that Stull, Fleet, Preas, letter men, and Wice, Parker, Summers, Pully, Abramson, and Newman would be the men to uphold the cage records of former Medico teams. Even though these men were working hard, the most optimistic supporter did not predict a very successful season.

The team played two games before Christmas vacation. The first one was with the fast American University team of Washington, on December the nth, at the Y. M. C. A. They defeated us 48 to 19. Our first game away from home was with the William and Mary quint there. The Medicos showed a decided improvement over their first appearance and forced William and Mary to their limit to win by a small margin of five points, the final score being 27 to 22.

The first game after Christmas was with the University of Richmond on their own floor. The fast work of the Spider quint made it possible for them to score an easy victory, 45 to 23. The guarding of Parker and the playing of Captain Stull at center was noteworthy. The score of 45 to 23 gives far from a true description of the game with the Spiders. The Medicos played a good game with a superior team, which had more time for basketball.

Our first revenge came in the form of a 30 to 10 victory over Randolph-Macon College on their own floor. This victory stimulated our team, and their spirit on the floor was greatly improved. For the next few games there was a better brand of basketball exhibited, and the team succeeded in chalking up victories over the St. John's quint, 33 to 23, and to win from the Union Theological Seminary, 27 to 22. This was the third straight victory for the Medicos.

The next Friday the Spiders were encountered on our court, and again they came out with the big end of the score by a victory, 51 to 27. Fleet and Stull starred for the Docs. Following this defeat the Medicos next encountered the Lynch-
Varsity Basketball Team, 1926-27

Summers - T
Wice - F
Fleet - G-F
Parker - G

Medicos
burg College quint in a rather slow and uninteresting affair. The Medicos were decidedy off, and did not measure up to their former standard in passing and shooting, which enabled the Hornets to win, 42 to 26. The Sawbones were unable to find the basket.

Our next games were played away from home on a three-day trip. The first was in Alexandria, with the Old Dominion Boat Club. This game was very rough and unexciting, the final tally being 24 to 21 in favor of the Boat Club. Our next contest was a victory over the St. John's quint on their court, 39 to 32. The Medicos played a stellar brand of ball. For the third game we came back to Washington, and for the second time during the season encountered the American University team. They were shoved to their limit to win, and the Medicos came within an ace of exploding their fifteen straight wins by completely playing them off of their feet in the second half of the game. Hicks was high point scorer for both teams, and the *Washington Press* stated that Hicks was one of the fastest men seen on the local courts. Stull and Fleet played a consistent game. The final score was 36 to 30.

The Medicos, in their next home game, lost to Randolph-Macon College. The Sawbones out-played their opponents in the initial period, but the Jackets in the vesper period unleashed a furious attack to wrest victory from the Docs by a small margin of 33 to 30. This game was one of the most exciting of the season. Randolph-Macon is noted for its fighting spirit, and they always have a team that is hard to defeat. It was anybody's game until the last whistle.

The Preachers were next to fall under the knife of the ever-improving Medico quint. This game was fast and furious, with the victor always in doubt until the final ball was tossed. The score was 38 to 31.

The season closed with a win over the Old Dominion Boat Club of Alexandria; our team playing brilliantly to avenge their defeat at the hands of this quint earlier in the season. The playing of Wice at guard was of starring quality, with Parker, Stull, Fleet, and Hicks only a shade behind. The two Medico guards were thorns in the sides of their opponents.

We think the 1927 basketball season was one of the most successful in the history of Medico cage annals. The team did not have a large percentage of victories, but taking the season as a whole, and considering the work of the men who were out for the team and the time they were allowed to practice, we say it was successful.
Resume, 1926

The baseball team representing M. C. V. on the diamond last spring probably made the best record of any M. C. V. team since the World War, when athletics at the institution were abandoned altogether for a number of years. The teams in basketball, baseball, and tennis have gradually improved since their reorganization in 1923, until the teams now compete successfully with the teams representing the largest colleges in the Old Dominion and adjacent states.

The season of 1926 began none too auspiciously. The weather was cold during the early practice sessions, and the field at the Church Hill Athletic Association was being conditioned, so that fielding practice was impossible for the first few weeks. The squad was small, largely inexperienced, and nothing but the zeal and determined effort on the part of Coach Hicks and his charges produced a winning combination. Much credit is also due to Mr. Jonah Larrick, Y. M. C. A. secretary, for his encouragement, counsel and inestimable aid in keeping the men together and help in the distribution and maintenance of the equipment with Manager Joyce.

The season began on March 31 at Hampden-Sidney. "Spritzer" Adkins, with a strong wind at his back, breezed them in too fast for the boys to see, so of course they couldn't hit them. The team went down 9 to 0, though some creditable fielding was done and the team never lost spirit.

In the next game played against the Preachers at the U. T. S. grounds, the team came back and defeated the churchmen by the count of 8 to 7 in ten innings. Pitcher Johnson did valiant duty, but the thing that brought joy to the hearts of coach and players alike was the bang of M. C. V. bats against the horsehide, which indicated an awakening of the heretofore sleepy batting eyes.

The team went to Ashland next and played the Jackets. After leading most of the way, the Medics were nosed out by a 2 to 1 score in a very close, well-played game.

The Bull Pups, from Wofford College in South Carolina, then caught the Medics unaware and administered the worst defeat of the season.
VARSITY BASEBALL TEAM
The Sawbones outpointed the Preachers for a second time during the season, winning from the Union Theological Seminary by a count of 13 to 4.

The next game was played with the Randolph-Macon Yellow Jackets, and this time they were downed by the score of 6 to 5 in a very nice game.

The team then journeyed to Williamsburg and curbed the much-tooted Indian team by a count of 3 to 2 in the prettiest and hardest fought game of the season. It was indeed a happy band returning that night after upsetting the dope pail completely and making real the dream of every M. C. V. supporter.

Bridgewater was then overturned in a twelve-inning affair by a 7 to 6 score in a hard game.

The season was brought to a close by a trip through the Valley of Virginia, in which Bridgewater and Washington and Lee were played. The first game was lost, 12 to 3, after the team had rode cramped in a bus for ten hours and had to play immediately on arrival. This poor showing was offset the following day when the team put up a wonderful game against Washington and Lee, being nosed out by the score of 2 to 1. The pitching of Saffelle for the Medicos and Woolwine for the Generals was the outstanding feature. This Washington and Lee team had previously defeated the University of Pennsylvania and Cornell teams.

The work of Leap behind the bat, Saffelle at first base and on the mound, and Frazier in the outfield were probably the most outstanding players of a well-balanced team. Shortstop was held down by Grady, Frank Jones and Fleet in a very acceptable style, and "Pie" Traynor Stull played a dependable game at third base, alternating at first when Saffelle pitched. O. C. Jones played consistently at second, and his great interest in athletics and ability as an athlete has placed him at the head of athletics at the Medical College of Virginia. The outer garden was amply guarded by Floyd, Fitzhugh, Tullidge, and Frazier. The mound duty fell to the lot of Saffelle, Fleet, Boyd, Johnson, and Riggins. The manager was Frank Joyce, with Ball, Hedley, and Blankenship as assistant managers.

Tennis Resume, Season 1926

A resume of the past tennis season, including two fall matches, shows the season to have been a very successful one. Nine matches were played, six being won and three lost. Any team that wins twice as many contests as its losses must be called successful, no matter what branch of athletics it may be.

The first contest of the season was with the Hermitage Club, the Medical College emerging the victor by the score of 6-1.

The second contest was one of the hardest fought matches of the season. The Seminary, which is noted throughout the state for its tennis teams, finally coming out victorious by the close score of 4-3. The playing of Lutz and Patterson was a feature of this contest.

The third match was against Randolph-Macon, who were the newspaper claimants of the college championship for the previous year, apparently forgetting the fact that their only contest with the Medical College of Virginia resulted in a tie. In this year’s match, however, the Medical College Racquetteers were easy victors by the score of 5-2.

The next two matches were on the “Valley Trip,” the tennis team breaking even with her opponents. Bridgewater College was easily overcome by the score of 6-1, this being her initial year in tennis competition. At Washington and Lee, however, the reverse was true, Lloyd by spectacular playing being the only member of the Medical College team able to wrest victory from a team that was our superior. The hospitality and good sportsmanship of the W. and L. team offset, to some extent, the sting of defeat and the entire team was able to dance at the gym that night.

The next match was lost to William and Mary by the score of 5-2. This contest was much closer than the score would tend to indicate, the teams being very evenly matched, many of the matches going to three sets, and
VARSITY TENNIS TEAM, 1926
several of the sets being deuce sets, the vital and deciding point always going against our team.

The University of Richmond was the next opponent, and after the dust of a bitterly contested match had settled, the Medical College was found to have won by the close score of 4-3. This was a most satisfying victory; the Spiders having defeated the Medical College the previous year.

The last match of the season was with our old rivals, the Hermitage Club, and like the first contest resulted in a M. C. V. victory—score 7-0.

The following men composed the tennis team playing in the order named: Lloyd (manager), Spessard, Lutz, Patterson, Wood and Preas. Neal and Moss were able substitutes and are strongly counted on for this spring.

Tennis as a college sport is rapidly assuming its deserved importance, and when it does the Medical College of Virginia will be ready to take her place with the best.

T. N. S.
Can You Imagine—

The tricks Dr. LaRoque could do with a trapeze instead of an electric light wire?
How lost Beach would be without his Dill Bucket?
Harvey Haag calling Dr. Haskell “Angel”?
Pop Brantly with nothing to say in a Student Body meeting?
What would happen if John Parker lost his voice?
Dick Love with lots of hair?
Perce Pharr becoming professor of Physical Diagnosis?
Harry Lyons conceding that teeth do not cause everything—including broken bones and G. C.?
Miss Reitz doing the Charleston?
“Lizzie” smoking a cigarette in Bio-Chem. laboratory?
Eddie Miller with a desire for knowledge?
Seth Gayle listening to someone else tell a story?

How Lummox the Ladyfinger Saved a Goodlie Portion of Ye Purse.

(Proving ye olde proverbe, "'Tis a longe allie which has not an ash can.")

When Lummox returned that night to his barren lodging, his faithful esquire, Digit the Dumbell, surmised that his master was in an uglie moode. And right wisely had he guessed, for did not the good knight throw each piece of his accoutrement at Digit on removing it from his knightlie person? Then, clad only in his barbed wire pajamas, he shouted, "Call forth my goodlie gang of gormandizers, that I may break the bad news, and perchance a head, eke."

And when they were assembled, he spake thus, saying, "Faithful knights, esquires, and pages—"

Whereupon they rose to a man, crying, "Hail, all hail, to Lummox the Ladyfinger!"

"I have to tell you why, this day week, ye shall not feast and make merrie." Bland, indeed, was their expression, for they knew not why he spake. But Lummox did continue in this wise: "It so happened that while hunting for humstrums on the heath this a.m., I did chance upon a fair ladie in dire distress, having caught her lily white fingers in flypaper of mine own setting. Then sware I a great oath by the ladie's pink chemise that I would free and marrie the damsel, who was right easy to look upon. So all this day, even unto the setting of the sun, did I labor to tie loose the frenzied female, which being done, I swang her to my saddle and took her to her father, whom men do call Francis, the Fishcake, and whose castle is in Clay-Street-on-the-Shockoe, a branch of East Hell. Then did I crave his consent to the betrothal of his daughter to me, Lummox the Ladyfinger, and if he had given it—" Lummox the Ladyfinger bowed his head.

"But the feast which you would give?" cried his merrie men, who were slow of wit and solid of dome.

"That was what I would if he had, but he didn't." Then to Digit, "Come over, knave." But Digit was loath to do so and showed it. "Oh, you must come over," said his lord and master. And taking a bowl of ripened curds which were at hand, Lummox the Ladyfinger crowned Digit the Dumbell, and peace brooded over the house.—M. I. T. Voo Doo.

Another Fable

Once upon a time there was the cutest little boy named Seth Gayle. Now, if Seth had one fault, it was in being so reluctant to talk about himself that the little boys and girls at the Medical College (where Seth went to school) named him "Silent Gayle." One day when little Seth looked on the bulletin board he saw that he had made—rather a low mark on a medicine quiz. Did Seth gripe or make out like he should have had a higher mark? He did not. Here is what Seth said when talking to a friend:

"Easiest quiz of the year, old pal; I flunked it, only got 54; but if the prof hadn't slipped me a couple of points here and there, the count would have been 0. I didn't know the stuff, and I deserved to flunk it; no one could kick on the way we were marked."

Epilogue: They didn't even wait until sunrise to pot this guy.
DANDRUFF?

Never again will you have to stay awake at night and weep for a lovely crop of dandruff all for your very, very own.

As you have probably been taught in Sunday School, Dandruff is not caused by anything else than a germ, the bottle bacillus, so designated because of its morphological characteristics which do remind one so of one of those things that you stumble over as you leave your girl's house in the morning.

There is only one way to bring tears of joy into the eyes of a bottle bacillus, and that is to show him a bottle of Souptureen, or to give him a good, brisk rub-down with this worthless preparation. Simply douse it on your scalp, full strength, and massage thoroughly. Inside of two days your hair will fall out, leaving you the proud possessor of a luscious layer of dandruff, somewhat resembling the after-effects of a severe snowstorm.

And the beauty of Souptureen is that it doesn't stain your hair or skin. (It just takes them off.) And it is not greasy,—oh, no!

SOUPTUREEN

—and Dandruff simply will not live apart
Westhampting College

A denominational school for young women. (Legal tender of all denominations accepted.) Three miles from Richmond.

Approached by the beautiful Westhampting car line,—which has the darлинgest motormen in town, girls,—this insult to education rears up on its elbow to gaze mystically down on Westhampting Lake, which interposes its damp self between Westhampting College and Richming College, where most of the potential neck of Westhampting College hangs out in the day time.

Yes, we have classes. For circular, address

MAYBE YELLER, DEAN.

MISS HOTSTUFF'S SELECT NECKING SCHOOL FOR POTENT MAMMAS

Situated in charming Penitentiary Bottom, and only two minute's walk from Oregon Hill, Miss Hotstuff’s school is nothing but the eggs when it comes to turning out trained neckers.

Miss Hotstuff has had postgraduate training in many of the most questionable institutions in America, and she has taken so many ten-cent store clerks and made them into seeming millionairesses, that old man Kresge says she will have to stop taking his girls or close her school. The constant turnover of his working force is ruining him.

For information write

MISS AINTSHEE HOTSTUFF
444 N. 44th St.

Scene near Miss Hotstuff's School
Fifteen Years Ago He Was
Making Only 8,000,000 Rubles a Month!

Look At Him Now (If You Can Stand It. We Can't.)

FIFTEEN years ago, Hezekiah Abernathy worked exactly eighteen hours per diem at his trade as an expert oyster opener and crab-deviler. He used to stagger home at night worn to a frazzle and discouraged with life. His little wife and his thirteen delightful kiddies used to clamber up on his back with tears in their eyes and beg for him to give them enough liquor to have a family whisky party, but his reply was always the same, "Yes, I no gotta da mon."

Then, one day, in perusing the Police Gazette, he came across an Inter-Gnashional Co-respondents School advertisement urging him to clip and mail the coupon. His decision was made.

That night, when he went home his wife greeted him with the usual salute with the rolling pin, and when he came to he said, his face wreathed in an idiotic grin, "Charity," he says, (her name was Charity): "Charity, I've went and wrote for a course in Uncientific Hog Raising at Home."

Five minutes later the first lesson arrived by insured freight, and from that day forward the Abernathys began to rise. This is how it happened (honest, it is). Hezekiah purchased two (2) pigs and installed them in the bath tub. "Might as well use every durn bit of space we don't need," said he (and, by George, we think he was right!).

Time passed. The Abernathys moved out of first one room and then another as their four-footed herd increased, until finally they (the Abernathys) stopped in the attic.

Today, Hezekiah can (and does) supply each and every member of his family with a daily ration of two quarts of bottled-in-bond. (Think of it, my darlings!) Why only the other day Mrs. Abernathy said, when she called on the Plant Juice Man—(I beg your pardon! Mrs. Abernathy did NOT call on the Plant Juice Man). Mrs. Abernathy (née Charity O'Toole) said to an I. C. S. representative (shall we express it in her own native, girlish manner?): "We allus thinks as they ain't nothink nor nobody what could have riz us to where we be now unless it was this here inter-nations Correehohsis Bunk."

THE MUDICAL SNOLEGE OF VIRGINIA

Was founded, so they say, and has had a hard time ever since to keep an "re" from between the "e" and "d" in the seventh word of this ad. We have an honor system which all of the students support conscientiously. (Stop that snickering, Oswald!) Our students do not sneer at knowledge which is not intimately connected with their own profession, and instead of placing emphasis on memorizing mobs of words and "facts" that may be proved wrong next year, they try to grasp the fundamentals of science and build up their working knowledge of medicine from those fundamentals. (As soon as the three hundred students who fainted after that last remark have been removed to the infirmary, we will proceed.)

For Information, Write to
JESSE JAMES MCCAULEY
Famous Old Songs

**After the Ball**

Triple Threat Hedley: "What color's best for a bride?"
Jake Spessard: "I prefer white myself."

She was only a wood-cutter's daughter, but gracious! what limbs!

Timorous Old Lady: "Is it dangerous to step on that rail, officer?"
Policeman: "No, madam. It isn't unless you put your other foot on that trolley wire."

**Events Leading Up to a Tragedy**

Mama, why is it that the nice man always leaves just before papa comes home?

Jimmie: "Why didn't you invite Ann to the German Club opening dance?"
Goldie: "I smelled liquor on her breath."
Jimmie: "I didn't know she drank."
Goldie (gripped and sad): "That's just it. She doesn't."

Marye bought a pair of skates
Upon the ice to frisk.
Wasn't she a silly girl
Her dainty *?

Girl's Voice: "Don't unbutton that!"
(Silence)
Girl's Voice (again): "Please don't take that off!"
(Silence)
Girl's Voice: "Does that have to come off, too?"
(Silence)
"Stop, you're hurting me."
Voice of Girl's Mother: "Stop your fussing, Mary. You're all wet, and if I don't get all these clothes off you'll surely take cold."
"Boy, don't aggravate me! That red lantern means danger."

**Boys, This is a Mean One. Don't Let Aunty See This!**

Her: "I just know I'll adore those sport hose you bought for me."

Him: "Well, I hope that they come up to your—er—ah—expectations."

We would insert that old one about the colored mammy asking the ticket agent for a ticket for Florence (Florence was the little girl sitting by the window), but we are scart everybody knows that one, so we will leave it out.

**This One Requires Artificial Stimulants to Keep It Out of the Tomb.**

Slave: "Your highness, a wow of a woman waits without."

Kink: "Without what?"

Slave: "Food or clothing."

King: "Feed her and bring her in."

Young 'Un: "Pardon me, this must be the wrong berth."

Old Maid (sighing): "How you boys do jump at conclusions!"

Editor: "You will just HAVE to pardon us for that. What would a joke section be without this one about the Old Maid?"

---

To a Howe's Fourth Reader

(I forgot where I saw this one, but I think it was in *Virginia Recl.*)

Looking through my primer book

Just the other day,

I saw this scrawl, and all

It said was, "Bill to May."

And I thought of all the things—

Her curly golden head.

"You know I do," and "I do, too."

That was all we said.

I wonder if she remembers, too,

The cow-lick in my hair?

No, I rather think that little May

Is raising Hell somewhere.

**+ + +**

A tricky jade, I'll tell the world,

Is little Lily Lartus.

She wears a smile upon her lips,

And mouse traps on her gartus.

**+ + +**

"Laugh that off," said the doc, as he fastened up the straight-jacket.

**+ + +**

"You know, I'll bet you're twice as beautiful off the screen," smiled the spider to the fly on the window sill.

**+ + +**

"What could be Sweder?" asked Olaf, as he gazed at his Cousin Sven's new tow-headed baby.

**+ + +**

**Also From Judge**

Bus Conductor: "You goin' to Ginter Park?"

Passenger: "Yes."

B. C.: "Well, we ain't."
I have an excellent position with an electric fan company in the largest Esqui- maux settlement in Greenland. I have been having occasional dates with the boss’ wife when he was away on trips, but the other night he came home unexpectedly. I am now recuperating in the company hospital. Do you think that he disapproved of my visits, or was he just playing?

Anxious:

I don’t think for a minute that your boss would be narrow enough to disapprove of your efforts to keep his wife from being lonesome. I would try again and find out definitely. A good undertaker in your vicinity is I. Sinkem Deepe.

Dear Miss Mollie:

I have been married three years and have twelve children. My husband used to love me devotedly. The first day of our married life was one of perfect felicity, but since that, his amorous attentions have been confined to playful chucks under my chin with the kitchen table, or to little love taps on the coco with the heavier of the kitchen utensils. My uncle offered me one million dollars if I would leave my husband. Now, Miss Mollie, what I want to know is whether you would leave him or not?

Doubtful:

Your case is a hard one to decide. Some people would say to leave him and take the million dollars. I say, however, to take the million dollars and leave him.

Jenny:

If it is a formal affair, suggest that you wash for a low neck.

Miss Mollie.
Ain't They the Cats!

First Cat: "The boss says that Miss Gotparts is the fastest stenog. in the office."

Second Feline: "Hm-m! S'pose that's where she gets so many new dresses."

Here's One of Our Most Ancient Ones

They say that Dill Hudgins was kicking about the high price of baths at the Y. M. C. A. "But, Mr. Hudgins, we can give you six tickets for a quarter."

"Yes, but how do I know that I'm going to live six years?" demanded the Dill.

Prof. (to dumb stude): "Did you go over this lesson?"

D. S.: "Yes, sir, I went over it, but I was too high up to see it."

She: "Have I showed you where I hurt my hip?"

He: "N-n-no."

She: "Well, we'll drive over there."

Safe If Not Sane

One: "Rufus Alley's wandering in his mind."

Two: "That's all right. He can't go far."

Miss Puttogether (standing between Mike Meador and a bright light, and gazing dreamily at the stars): "'Mike, don't you just love to watch the heavenly bodies?"

Mike (not gazing at the stars): "Yes, and especially on a night like this when they can be seen so clearly."

Almost

Willy: "Does your girl smoke?"

Nilly: "Not quite."

Peyton: "Quick, Mistah McCrackan! A wildcat's jes' ran in yo' office, and Miss Harman's in there!"

Liz (deliberately): "Well, he'll just have to get out the best way he can."

Fannie: "I wouldn't give you a straw if you were drowning."

Cliff Beach: "I wouldn't touch it if you did."
"This is a pretty snappy suit," said the baby, as he pulled on his new rubber panties.

Passamaniac: "I heard a new one the other day. Have I told it to you?"
Stull: "Is it a good one?"
Pass.: "Yes."
Stull: "Then you haven't."

"Izzy Rifkin made a fortune out of his oil well."
"Is that so? I didn't know that he struck oil."
"He didn't, but he pulled up the well and sold it for post holes."

Dumb: "Did that patent medicine that you bought cure your aunt?"
Bell: "Mercy, no! She got two new diseases from reading the paper that was wrapped around the bottle."

"That must have been a warm number you introduced me to last night."
"How come?"
"I asked her if I could take her home."
"Well?"
"And she asked me where my folks were."

Yes, You Have Seen This One in Judge

Munroe Winefinger, 12, of the Bronx, is the handiest boy in his troop. Say, people, you should have seen the radio set he made out of an old piece of ham and two forks! Well, here is a clever one from Munroe: He was in a crowd, and he happened to bump into a rather pretty girl. "Say," demanded the lass, "Who you shovin'? Who you shovin', anyway?" "How should I know?" countered Munroe, rolling his eyes. "We never been introduced, have we?" This effectually silenced the girl, although she told reporters later that she wished she had crowned Munroe then and there.

It was their last morning dip together at the seaside, and he quoth: "I suppose I shan't be seeing as much of you this winter?"
"Oh, I don't know," she snorted saucily. "I'm getting some perfectly dear evening gowns from Paris next week."
The Unit that Grows
Grows with YOU!

In addition to its superiority in construction, appearance, and efficiency, the E. D. unit is the only unit that solves perfectly the problem of development for the successful dentist.

The Electro Dental Unit is the only one with an electric bracket table; the only unit where reaching across the patient is unnecessary, the only unit where all the instruments are ideally located for greatest convenience.

DRUG CO.
LIMITED

1000-1002 E. Cary Street
RICHMOND, VA.
The magnificent suburban home of the late Major Ginter, by alterations and extensive additions, has been transformed into a private institution for the treatment of nervous diseases, mild mental cases and select alcohol and drug habitues.

The grounds are ample, quiet is assured, and a new building for men makes easy separation of sexes. A number of cottages make possible satisfactory and congenial grouping.

Rooms single or en suite, with or without private bath. Hot water heat, electric lights, artesian water. Bowling, tennis, croquet, billiards and a gymnasium afford recreation. Electrical and Hydrotherapy equipment. Nurses and attendants trained for this special work. Four physicians reside in the Sanatorium and devote their entire time to the patients.

PRIVATE ROOMS
Private rooms with accommodations for one, two, three and four patients
have been provided. The charges for general board and care are from $3.75
to $6.00 per day, which includes general nursing care, the services of the Resident
Physician and the House Staff, bacteriological and pathological examinations,
medicines and prescriptions compounded in the Hospital Pharmacy and surgical
dressings.

Other charges for ambulance service, the use of delivery and operating rooms
and X-Ray examinations are reasonable.

All reputable physicians and surgeons in Richmond have full privilege (includ-
ing the use of the operating rooms) to treat patients occupying private rooms
in any of the hospitals.

PUBLIC WARDS
The charge for patients in the Public Wards is $3.00 per day, which is in full
for all examinations and service necessary, there being no extra charges.

The privilege to treat patients occupying beds in the Public Wards is restricted
to a group of physicians and surgeons appointed by the Executive Committee of
the Board of Visitors, selected from the Faculty of the School of Medicine of the
College. Physicians and surgeons do not receive a fee or any emolument for services
rendered by them toward patients.

Mellin's Food—A Milk Modifier

It has long been recognized that the stated purpose of Mellin's Food is supported by a foundation in keeping with the essential problem of the artificial feeding of infants.

Through the acceptance of the principles of Mellin's Food and the ever-extending use of Mellin's Food as a milk modifier, a method of procedure has gradually developed to finally evolve into

An Established System of Infant Feeding.

The simplicity of this system, and the eminently satisfactory results from its application in the feeding of both well and sick babies, are matters worthy of serious consideration.

This system is set forth clearly and concisely in "Formulas for Infant Feeding". A copy of this book, bound in leather, will be sent to physicians upon request.
Your success in dentistry is dependent not only upon the professional ability which you have attained the past four years but upon correct business methods and modern equipment.

Realizing this we have worked unceasingly to collect and distribute data which will assist the beginner in the practice of dentistry, as well as to manufacture the best and most up-to-date dental equipment modern science and trained minds can produce.

We only ask that you take advantage of the assistance we offer you.

Superintendent of Hospital and Principal of the School of Nursing
There once was a man in Pawtucket
Who kept all his cash in a bucket,
But his daughter, named Nan,
Ran away with a man,
And as to the bucket—Nantucket.

But he followed the pair to Nantucket,
The man and the girl with the bucket;
He said to the man,
"You are welcome to Nan,"
And as to the bucket—Pawtucket.
—M. I. T. Voo Doo.

Garcin: "Have you any class now, Violet?"
Hollowell: "Look me over, kid."

Maybelle: "You tickle me, Duke."
The Duke: "My word, what a strange request!"

She: "Don't you just love nights like these?"
He: "No, sometimes I study."

In the estate-building plans of the average young man, particularly the recent graduate from school or college, life insurance should enjoy first consideration as a means of practicing that thrift which has ever been the basic factor of every outstanding success.

For thus making youth the servant of one’s future, modern finance knows no method superior to that afforded by Endowment policies.

Broken Blossoms

You called me “little pal” a year ago,  
You told me I was very nice to know,  
You told me what love was—I thought I knew,  
But then . . . . . . oh, hell!  
—M. I. T. P’oo Doo.

+++  
“Were you and daddy good boys while I was gone?” asked Mrs. Crockett.  
“Oh, yes, mother,” replied the child.  
“And did you treat the nurse respectfully?”  
“I should say we did.”  
“And did you kiss her goodnight every day?”  
“I should say we did.”  
(This explains the heretofore mysterious absence of Mr. Crockett from his classes for two days.)

THE Coolidge X-Ray Tube, which has revolutionized the art of radiography, was developed in the Research Laboratories of the General Electric Company. In collaboration with these same laboratories, the Victor "CDX" Dental X-Ray Unit was evolved, when Victor X-Ray Corporation's Engineering Department, with its background of experience in the design of X-Ray apparatus, worked with the physicists of these laboratories, to the end that the mechanical and electrical design of the X-Ray unit would answer the critical requirements of the Coolidge tube itself. Thus has emanated a perfectly balanced equipment.

Inasmuch as the "CDX" Dental X-Ray Unit is sponsored by the same research facilities as all other notable "G. E." developments, and the Victor X-Ray Corporation is the subsidiary that extends intangible service to the dental and medical professions in their X-Ray and Electro-Medical requirements, what better safeguard could be offered on your investment in dental X-Ray equipment?

"Still the Best Place to Eat and Sleep"

UM-M!
She (tenderly): "And are mine the only lips you have kissed?"
He: "Yes, and they are the sweetest of all."—M. I. T. Voo Doo.

Him: "So you don't think I can call your bluff?"
Her (easing her curves up against his manly thorax): "Not unless you are a little boulder."

A model woman is a bare possibility, but a woman model is a naked fact.

"Father?"
"Yes, my son."
"Father, after an army has shelled the enemy, do they eat the colonels?"

Jim: "Well, I surely knocked 'em cold in my courses."
Mie: "Yeah, whadja get?"
Jim: "Zero."
How To Write a Preface to a Loose-Leaf System of Medicine

(With Apologies to M. I. T. Voo Doo.)

[Note: Although prefaces to scientific books have been written for so long now that the methods have been thoroughly standardized, and the present day preface writer need only make his decision as to which of the three forms he wishes to utilize, it is felt that the incorporation of a certain amount of truth into prefaces would not be without its advantages, and it is with these considerations in mind that the following sample in the newer style is presented.]

**Preface**

This present volume on "Applications of the Differential Calculus to Hog cholera and Gase Blowing" is the outgrowth of a set of mimeographed notes which had been used unsuccessfuely in the classroom of Bohnikus College for a number of years, and which, it was felt, were deserving of a more permanent form, heaven knows why. In response to repeated requests received by the authors from their landladies for some promise as to when back room rent might be paid off, it was decided to issue the present volumes, which now appear in a form that the authors wish would be found suitable by teachers and students of the subject in colleges and hospitals, but which they know blamed well will not.

In issuing the volume at the present time, the authors feel that some explanation is due to students of the subject, in view of the fact that twenty-five similar systems have recently appeared, and that they might be thought to be covering the same ground already gone over in a number of other excellent treatises. As a matter of fact, this is exactly the case, but as it would be rather difficult to give any explanation at all, none will be attempted. The writers, therefore, have no apology to offer in connection with the appearance of their book at this time.

Throughout the work, special emphasis has been laid on the importance of writing it in a manner such that no student, however industrious, can possibly understand what is being talked about. Thus, he will either (1) drop the course, and save the instructor from correcting his papers, or (2) will flunk it, and have to take the condition exam, for which a suitable fee may be charged. Mathematical rigor has not been dispensed with—in fact, it may be that a number of cases of rigor mortis will develop in readers of the text, but it is thought better to risk this possibility than to do anything which would shake the student's belief in the entire impossibility of the subject. It is thus our hope that the book will fill a long felt want, or if not felt, then cotton batting, as Babe Ruth never said.

Finally, the authors wish to express their appreciation and gratitude to a number of old busybodies who fooled around while the work was in manuscript in the hope of getting their names in the preface, and who were altogether too numerous to thank personally. Our indebtedness to Prof. Hopp-W. Caudwell, of the Packing Case Medical College, who read the manuscript five times and made a lot of darn fool suggestions which were found very hopeless, is so great that we cannot avoid mentioning it, much as we would like to do so. Also, to our colleague, Dr. John T. Horseradish, whose inhuman idea it was to remove the index and table of contents, in order to make the volume more portable and less intelligible, we express our sincere thanks. We are further grateful to W. B. Zank, to whose careful and painstaking reading of the proof is due the fact that there are no mere typographical errors than there are. As a matter of fact, he wrote the whole thing, but having no reputation, it was obviously impossible to credit him with the authorship. In closing, the authors wish to express their deep thanks to each other for their generous and at all times unselfish and unthinking co-operation.
